1957, no. 8, p. 29-33.

DESCRIPTORS: *Briquettes, Mixtures, Ceramic
materials, *Glass, *Material forming, Manufacturing
methods.

Effective methods were sought for the briquetting of
mixtures for glass making in order to eliminate a
number of disadvantages resulting from the use of
loose materials in glass melting. On the base of the
work done, the following conclusions are derived: it is
possible to prepare briquets of sufficient mechanical
(Materials--Ceramics, TT, v. 10, no. 12) (over)
