DESCRIPTORS: *Parabolic antennas, Antennas,
*Antenna radiation patterns, Mathematical analysis,
Computers, *Reflectors, Design, Electric fields,
Magnetic fields.

The text discusses a procedure and results of calculation of radiation patterns of widely used parabolic antennas with beam scanning by displacement of the radiator from the focus. The distinctive feature of the methods described in the text is the use of an electronic computer (BESM), permitting complex and sufficiently precise calculations. The use of such (Engineering-Electronic, TT, v. 8, no. 8) (over)
