CONTROL OF GAS-TURBINE AND RAMJET
ENGINES. L. A. Zalmanzon and B. A. Cherkasov.
(Translation of publication by the Government Defense
Industry Press (Moscow), 1956.) July 1961.
ii. 257p. ODS price, \$4.00.
(NASA TECHNICAL TRANSLATION F-41)

Attention is concentrated on describing the physical bases of the processes of engine control and an exposition of the methods of experimental study and design of control apparatus. A series of examples bring out the close connection between the operation of the elements in the control loop and the fuel supply system of the engines. The characteristics of the several elements of the fuel apparatus are given. The book is written as a textbook for students in aviation institutes, but may also be useful for workers specializing in the field of aviation engines.
