A review is presented of Soviet shop experience with
gages made of ceramics, ceramic plates for drawing
metals, ceramic dies for press work, and ceramic
guiding sleeves and other machine parts subject to
wear by friction. The ceramic items frequently do a
better job and last longer than their metal counter-
parts, and they are much cheaper.

DESCRIPTORS: *Polyvinyl chloride, Degradation,
Stabilization,

The first section of this book draws attention to the
mechanism of degradation as well as stabilization.
The second section comprises a methodical and com-
plete compilation of numerous proposed solutions. The
third section summarizes the first two by including
scientific examination of methods currently in use.
