Trans. of Physica Status Solidi (Germany) 1962, v. 2,
no. 4, p. 411-416.

DESCRIPTORS: *Germanium, Electrolytes, *Semi-
conductors, Surfaces, Conductivity.

Potential distribution at the germanium - NaOH solution
interface was investigated. The contribution of the po-
tential drop through the space charge region in the
semiconductor γ to the total potential drop at the inter-
face was determined by means of surface conductance
measurements. The change in the potential drop in the
ionic part of the electric double layer depending on the
