The instrument of the "ФЭ-3М" type has three meas-
urement limits: 100, 500, and 2000 mv. The time of
damping of the instrument is 0.3 sec. The error at a
100 mv limit does not exceed 1%. The value of the out-
put current for all measurement limits is 5 ma, with a
loaded impedance up to 300 ohms. The use of this
apparatus in practice has demonstrated its high opera-
tional properties. (Author)
