DEGREE OF COOKING AND EVALUATION OF
KRAFT PULPS. [1961] [10]p.
Order from SLA \$1.10

62-14254

Trans. of Zellstoff und Papier (Germany) 1961, v. 10,
no. 9, p. 329-334.

DESCRIPTORS: *Wood pulp, Processing. Mechanical
properties, Paper industry.

Tests showed that degree of cooking is a satisfactory
criterium for Kraft pulps both in regard to pulp yield
and other properties which are significant for addi-
tional processing. The general character of correla-
tions between pulp yield, pulp strength and degree of
cooking of Kraft pulps is similar for pulps made at
different cooking conditions (maximum temperature,
alkalinity, sulphidity). Maximum screened pulp yields
were obtained at Oestrands numbers 65 to 60 (73).
(Materials--Wood, TT, v. 8, no. 1) (over)
