Trans. of Meditsinskaya Radiologiya (USSR) 1962.

v. 7, no. 7, p. 57-62.

DESCRIPTORS: Gases, Rats, Peritoneum, Injection
(Medicine), *Cysteine, *Cysteamines, *Radiopro-
tective agents, Metabolism, *Oxygen.

It is shown that the internal milieu of biological objects
exposed to irradiation is disturbed after administration
of cysteine and cysteamine. The metabolic processes
are intensified and the CO₂ excretion and the RQ are
increased. It is evident that the direct part played by
the oxygen demand in the mechanism of the protective
action of cysteine and cysteamine is very small; the
latter is not the result of the specific action of these two
