DESCRIPTORS: *Anthropology, *Polynesia, Culture,
Translations

The aim of this article is to prove that there were not
two different peoples on Easter Island. The division
into short-ears and long-ears is a division between
two groups of the same people. The evidence in favor
of this statement is from a small "kohau rongo-rongo"
text deciphered by the author. This text is inscribed
on the small Chile table and represents a genealogy
consisting of six names. (Author)
