CHANGES IN THE GEOGRAPHY OF RURAL SETTLE-

Trans. of Geografiya i Khozyaystvo (USSR) 1963,
no. 12, p. 13-18. (Abstract available)

DESCRIPTORS: *Geography, Population, Distribution,
Rural areas, Agriculture, Economics,

The present settlement pattern of the long-settled
northern part of the virgin lands consists of relatively
small population centers. On the basis of field work,
the author finds that the concentration of population in
larger centers at the expense of subsidiary settlements
would provide better services to the rural population
without interfering with the efficiency of farm
operations. (Author)
