DESCRIPTORS: *Luminescence, *Discharge tubes,
Low pressure research, Gases, Impurities, Fluores-
cence, Mercury lamps, Neon, Xenon, Powders,
Barium compounds, Oxides, Cathodes (Electron tubes).

Although the gas pressure inside luminescent tubes
may be several millimeters of mercury, it is neces-
sary before introducing the desired gas, to create a
vacuum in these tubes as in radio tubes. In fact, the
least trace of foreign gas can greatly impair the
appearance and life of the tube. (Author)
