DESCRIPTORS: *Plasma physics, *Electric arcs,
Classification, Equations.

Content. For each gas discharge plasma 6 equations
are given. From these are found the arcs, when the
plasma is quasi-neutral and the carrier concentration
is found from the temperature equilibrium. The dis-
cussion of the boundary condition leads to the 3 types
of arc: The wall-stabilized arc, the electrode-stabi-
lized arc and the convection-determined arc. In the
first the temperature in the arc axis is determined by
