Trans. of Zeitschrift für Wissenschaftliche Photo-

1960, v. 45, no. 1/3 [p. 321].

DESCRIPTIONS: *Photographic emulsions. *Manu-
facturing methods. Potentiometers. Volumetric
analysis. Quality control. Silver compounds. Brom-
ides. *Photochemistry.

Modern electrometric methods of examination have
replaced purely chemical methods in the control of
the manufacturing processes of silver bromide emul-
sions because they bring results more rapidly per-

mostly and are often more accurate. The numerous possibilities of both the testing of the raw materials of the manufacturing operations as well as the continuous control over the finished product by the electronic methods of determination and the superiority of these methods as compared with the gravimetric and titrimetric methods, are shown by means of various examples.
