

Werr, F.
THE DETERMINATION OF THE GREASE RESIST-
ANCE OF PAPERS. PT. 1. [1961] 12p. (1 fig.
omitted) 36 refs
Order from S.I.A. \$1.60

62-10149

Trans. of das Papier (West Germany) 1961, v. 15,
no. 8, p. 222-229

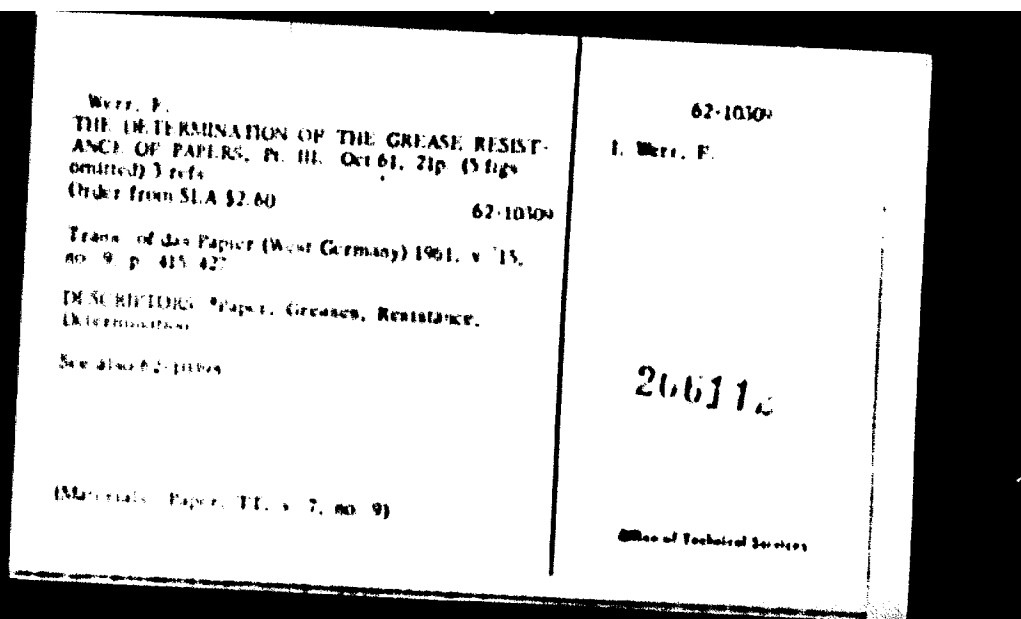

DESCRIPTORS: Paper, Greases, Resistance,
Intermittent

The article outlines observations made concerning
grease resistance and greaseproof papers. The test-
ing methods currently employed are described and
critically examined by taking into consideration ex-
perimentally obtained results. In establishing a
standard method for testing a paper consideration
must be given to the purpose the paper must serve.

METHOD FOR MEASURING AND PRODUCTION OF
BORES OF WIRES WITH PRE-DETERMINED
ROUNDING-OFF RADIUS AND BEARING LENGTHS.
[1962] 9p. (figs. tables formulae omitted).
Order from SIA \$1.10 63-10005

Trans. of Stahl und Eisen (West Germany) 1952,
v. 72, no. 2, p. 66-69.

DESCRIPTORS: Measurement, Production, *Boreholes,
*Wire, *Wires, Drawing (Machine processing).

Differences in dimensions in the use of conical test
needles for the determination of the cylindrical bearing
length z in drawing tools obtained from measuring
values of both the angular drawing bore and the final
form with rounded off edges make it possible, on the
basis of geometrical derivations to determine the

Office of Technical Services

rounding-off radii and thus the actual length x . Thus the pre-determined bearing length and the rounding-off radii desired may be checked and maintained, on a shop basis, in an inexpensive manner, using intermediate measurements during the production of the drawing bore. Checking of radii when the drawing bore are finished is not possible without knowledge of pre-determined dimensions. A standard form containing record with respect to the drawing bore measurement may simultaneously serve for notes in plant experiments which facilitate the determination of optimum drawing bores which will suit the individual requirements of each plant and furnish data for its most economical production.
