VISCOUS AND ELECTRICAL PROPERTIES OF LIQUID BINARY ALLOYS AND THEIR RELATION TO THE STRUCTURE OF THE LIQUID. [1960] 18p. (8 figs. omitted) 9 refs.
Order from LC or SLA ml\$2. 40, ph\$3. 30 61-10271

Trans. of [Zhurnal Fizicheskoy Khimii (USSR) 1957 v. 31, no. 10, p. 2269-2277.

The hysteresis of the viscosity and the electrical conductivity of liquid alloys in the Cd-Sb, Pb-Tl and Bi-Tl systems was found. The alloys of the Sb-Sn and Cd-Cu do not develop hysteresis of these properties. A considerable influence of ordering on the properties of the systems was found. A tendency towards the appearance of anomalies according to the degree of removal from the ideal state was noticed. (The sequence is Pb-Tl Sb-Sn Fe-Ni Bi-Tl Cd-Sb Cd-Cu). (Author)
