CLASSIFIED
23 MAR 1988

MEMORANDUM FOR: Director of Information Technology
25X1 FROM: [redacted]
Director of Training and Education
SUBJECT: OTE Use of Secure Facsimile Machines

Ed

1. The Office of Training and Education frequently needs to rapidly and securely transmit hard copy information to various training locations including Headquarters [redacted] [redacted]. A secure facsimile transmission would meet this requirement. The courier service, though effective for normal mail distribution, cannot meet the tight time requirements, particularly at our remote facilities.

2. I understand that OIT has initiated action to survey the facsimile machines used by CIA offices in the Washington area and then coordinate the replacement of obsolete systems with an Agency standard machine. OTE would like to participate in a CIA secure facsimile network in the Washington, D.C. area
