DDA SUBJECT FILE COPY

DA 89-0977
6 June 1989

NOTE FOR THE RECORD:

- On 30 May OS/ISSG personnel provided the attached briefing to the ADDA/DDA on implementation of the DCID 1/16 Task Force recommendations.
- Throughout the briefing, the DDA expressed dismay regarding the sorry state of our computer security posture--he thought we were better off than we actually are.
- All acknowledged the technology required to provide the needed security is not here yet and that this area is fraught with extremely difficult problems.
- The DDA concluded that OS was going in the right direction.
- He said he would approve the first three recommendations after OS had briefed the major concerned offices in the other Directorates, such as OIR, OIT, OD&E.
- OS could then also proceed with Recommendation 5.
- Regarding resources, he advised the D/OS that he would have to seek them through the budget process.
- I confirmed that the resource chart is misleading--what is needed is the difference between what they say is needed and what they point out is in the program (INFOSEC initiative).
