LOGNOTE -- Chief, Operations Group, 24 October 1983

- 1. [redacted] called on 24 October to say the departure of [redacted] 29 October combined with the continuing need for 24-hour staffing to monitor the Grenada situation will require TDY monitorial help until the situation eases. After discussion with Acting Chief Prod and C/ELAAD it was decided to TDY [redacted] to Key West o/a 28 October. Meanwhile we would try to move up the timing of [redacted] TDY to Barbados to 26 October in view of cabled reports that a CariCom invasion of Grenada was imminent. To that end a message was sent to Bridgetown requesting [redacted] approval for their earlier arrival. If they could eliminate the AC hum on the Barbados telephone lines we might be able to set up a remote monitoring effort piping Grenada and other sources to Key West. [redacted] could then hop from Key West to Barbados to help. 25X1

Bridgetown replied that in view of heavy TDY traffic there they would prefer to put the [redacted] TDY on hold until the situation improves. [redacted] confirmed KW still needs monitorial and teletype help. [redacted] will process for departure for KW ASAP, but no later than 28 October. 25X1
