88 vera lebedeva on military maneuvers in mideast, says preps are being made for an extensive provocation near iranian borders. military maneuvers on such a vast scale did not take place even at time when aggressive cento pact existed. Draws attention to fact that objective behind these forthcoming maneuvers is not only to test u. s. military techniques and rapid deployment force. these maneuvers pursue political objectives in addition to military objectives. these political objectives are to terrify nations of near and middle east and to carry out a show of strength by u. s. armed forces near these countries' borders. these maneuvers near your country's borders are not accidental, and it should not be forgotten that washington strategists compiled a plan for aggressing iranian territory from the south a long time ago. as confessed by weinberger, possibility of using nuclear weapon has not been ruled out in this plan. meanwhile, imperialist propoganda machinery continues to talk about imaginary soviet threat, while actually soviet union does not threaten iran or any other regional country -- proof of this being ussr's peace-seeking initiatives. As for the persian gulf soviet union believes that all foreign bases should be dismantled, the use of nuclear and other weapons in this region be prevented, and nonaligned policy, which was adopted by iran too after the revolution, be respected. these initiatives have helped to thwart washington's objectives in region, and this is why imperialists are trying to distort facts and to claim that soviet union is threatening region. But as our listeners write, imperialists' allegations are not able to deflect region's attention from true danger that emanates from washington. (8 min: persian 1700 1800)
