8 vikentiy matveyev of izvestiya discusses conflict situation in world, drawing attention to central american situation and thatcher claim that britain had no right to denounce u.s. actions in central america since during falklands crisis washington likewise refrained from criticizing london; as washington ldrs press for deployment of pershing-2 and cruise missiles in western europe, they would like to get new lever to influence their nato partners; cruising of u.s. naval flotilla off shores of nicaragua, dispatch of awacs radar planes to saudan, airlifting of milit equipment to chad and many other facts show also true meaning of plans to install new american missiles in western europe. on one hand missiles are targeted against socialist countries, but on other they are aimed against vital interests of countries and ppls on western europe. (italian 1900) *US*

11 aleksandr malik comparing soviet assistance to developing countries with aid provided by imperialist countries, especially united states, and states while former is absolutely beneficial to people, latter is aimed at gaining maximum profit from developing countries under pretext of help. cites in this context soviet union's friendly help to india in building bokara an other steel industries.
