

~~ADMINISTRATIVE - INTERNAL USE ONLY~~

ODP-84-1033

9 JUL 1984

MEMORANDUM FOR: Director of Security, DA  
Director of Central Reference, DI  
Director of Research and Development, DO

STAT

FROM: [Redacted]  
Director of Data Processing

SUBJECT: RECON GUARD Status

1. In mid-June each of our organizations completed testing and evaluating the RECON/GUARD Prototype System. I have been told unofficially that these tests were successful and that an Operational System would provide a secure "gateway" between our computer centers and any network--COINS or otherwise. Further, I have been told that the Operational System would be built on the architectural principles proven in the Prototype and retested. Currently, the test equipment has been disconnected and moved to the [Redacted] Center staging area.

STAT

2. As requested, the CIA Member to the Information Handling Committee plans reporting on RECON GUARD to the Chairman before the Committee's next meeting. To make this report, the CIA Member requires your official evaluation of the Prototype System and the test results by COB 20 July 1984.

STAT

3. Please forward your findings to [Redacted] in 2D0105 HQS. If you or your staff have any questions, he may be contacted on [Redacted]
