4. REPORT OF FINDINGS

On 14 June 1983, Source CL-01 was interviewed concerning a meeting scheduled for 13, 14 or 15 June 1983. Participants at the meeting were unknown to Source and were identified only as Person A and Person B. Source was shown a photograph of Person A. Source described the meeting substantially as follows:

The meeting was in a room owned or controlled by Person A. Inside, the room had an open appearance as though it were two stories high. Source described the building as residential, a place of many families, an apartment building, fairly modern with outside staircases, and perhaps four stories high.

Present at the meeting were Person A, Person B and another unidentified individual. During the meeting Person A sat at a small table or coffee table. One part of the discussion at the meeting centered on a storage area which was described by Source as a gray room with a high ceiling in which there was a tank (not further identified) and many other things (not further identified). There may have been a photograph of this storage area at the meeting. Another part of the discussion centered on a map which Source described as having a "blue background" and "red lines" (not further identified). The map discussion involved a certain place (not further identified), date (not further identified), and a passing through an area, specific area, "some kind of area they wouldn't normally go through" (not further identified). Source reported that at this point in the discussion the key word "interdiction" was important. Source reported an argumentative point concerning the "use of force" (not further identified) to "interdict the shipment" (not further identified). Source thought that the word interdict might mean deliberate ambush. At another point

4. REPORT OF FINDINGS

in the meeting there was concern for the safety of Person B "after" (not further identified). At this point the meeting, "payments" were also discussed. There were to be three payments through banks; "one prior, one after, and a third very large sum later."

At the end of the meeting there was agreement on a tentative date, time, and place (not further identified) and an alternate date, time, and "same place" (not further identified). This agreement was not for a meeting, but for "an interdiction, some kind of ripoff" (not further identified).

Without being questioned, Source volunteered that Person B might be involved in "some form of sabotage, blast and fire." Source was unsure if this activity involved the present area of concern and was unsure as to the significance of this information. This activity involved "blowing up some engine or setting fire to some engines" (not further identified) and "precise timing or moment" (not further identified).

No further amplifying information concerning the meeting was obtained from Source during this interview.
