900 - BROWN

SUMMARY: site consists of rolling hills/7. medley flat land. series of structures probably around the juncture of the hills and land and stretching up and out. structure appear to be low probably not more than 2-3 stories. area is green, balmy. There is a arched or curved structure here. and a low long structure without much of a vertical component.

STRUCTURES APPEAR TO BE MADE OF NATURAL MATERIAL. People are brown skinned with dark hair. A GROUP OF WOMEN IS GATHERED TOGETHER. They ARE LIGHT HEARTED AND LAUGHING. BUT THEY ALSO HAVE A PROPER FEELING AND ARE POSSESSED OF A VERY SIMPLE DIGNITY. (THEY REMIND ME OF THE WOMEN I HAVE KNOWN)

area is a farming community, animals are used, irrigation ditches. There is fresh vegetation, inside vegetation it is hot and steamy. People have a feeling of community. There is a common heritage. Religion is important in lives. Rituals are important. People are calm, satisfied almost passive. They are smaller than average american. Colors appear to be important to them. They have adapted to their life style very well. Life may be somewhat primitive but there are no ulcers here.
