just crazy
people

flashing lights

bi-to buch -

Site consists of a tall square structure enclosed
in a compound. Enclosure seems to be wire
fence. There is a military atmosphere associated
with the structure - people in uniforms. The
people seem to be crazy in that there are
not outstanding emotional perceptions. Flashing
lights are also associated with the structure.
There is an underground component to the
structure. The people here are more blue-collar
than professional. The underground facility
is composed of a large room with access by
low & tunnel-like passage ways.

The main fenced structure is in a populated area. The underground facility is located away from the main structure, but is connected and within the compound. The main structure is for administrative purposes. The underground facility is used to construct equipment of a military nature (Au).
