Site is land/structures, interfac. One structure is

tall, large, solid, ^{with a} sense of massiveness, imparting the feeling
 of being overwhelming. Noticeable (unpleasant) ^{Chemical} smells & taste;
 atmosphere seems dim, ~~dark~~ dark, hazy. Another ~~one~~ involves
 a pronounced sense of roundness or curving around & also
 has noticeable industrial-like smells.

One structure is a building of numerous levels, at
 least one of which is filled w/ cubicles divided by
 a central corridor. Cubicles are small restrooms, access
 is controlled, & involve segregation, a sense of observing & of
 being organized, & of development. People seem to be in
 the cubicles, & may have originally been there for other
 purposes but are being used because they're convenient there.
