

Project CY 8609

sk

1. Describe the Technical Facility located via:

SG1A

2. Within the following ten year period determine if and when any "special events" occur:

Note: If you do find any "special events" - - - subsequent sessions will be focused on each separate "special event."

5 1/2 item is "put" into "tradi" - bound into it a
vibroducted/reflected

carefully "Broken off" large mass a quantity, given odder
impetus, + sent on.

mass

heavy
dense

active

5 1/2 size doesn't matter - can be b.g or lit. is ideal for
purpose. Refined. Stabilized. Shaped. Affixed. After upon.
It's like this whole chunk might explosively
worked with just to "probe" a few pieces off. may not
even be further used up after that.

faceted
etched

smooth

grains

5 1/2 surface texture reminds me of a very fine-grained
grind stone. Chunks broken off proportionates
extremely small

They can go faster.

SVI

52: D AZ EI T I For Hg

3 1/2 "chunks" "knocked off" by evenly distributed, finely
finely directed, suddenly actuated, uniform force. Not
sense of mechanical force. Force causes heat, involves
parallel lines. Only momentary in duration. Sounds
like buzz-pop. Mass is grayish color. Temperature ->
room temperature normally.
