PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8711	SESSION NUMBER: 2
DATE OF SESSION: 23 JULY 87	TARGET COUNTRY: IRAN
REFERENCE:	MISSION STATUS:
TECHNIQUE UTILIZED: CRV	SOURCE IDENTIFIER: 018

1. (S/NF/SK) Monitor Tasking: Identify and describe the placement and 
2. (S/NF/SK) Source Tasking: Describe the target area (identified in Session #1) on each of the following dates: 3, 10, 19 and 23 July 87.
3. (S/NF/SK) Summary: Throughout the period 3-23 July 87, the objects (missiles) remained in the large, grey room:
 - 19 Jul: Missiles in opened boxes; contents being inventoried.
 - 23 Jul: Missiles being assembled and checked out.
4. (S/NF/SK) Comments: Monitor has a fair degree of confidence that the session produced valid information.

UNITED STATES GOVERNMENT

memorandum

DATE: 23 July, 1987

REPLY TO
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY, PROJECT 8711 (C-SS)

SG1J TO: DT-S (ATTN: [REDACTED])

1. (S-SS) Statistics:

Project #:	8711
Viewer:	018
Session date:	23 JUL 87
Document file:	8711.L01

2. (S-SS) Impressions gained from the session include descriptions of the site and various objects and activities on certain dates. These are:

a. July 3, 1987:

- 1) An open green area where there appear to be two people. Both are male. One is blond headed w/ a soft (AOL: John F. Kennedy type) hair style. The other has dark hair, a dark suit, and seems to have darker skin than the other.
- 2) The previously described "object #1" (ref: 8711.L01) was located at this site. There was a man working on the object with a tool. The room at this time was the same as previously described, but appeared much darker. The man stopped work, straightened, patted the object with a tool (AOL: crescent wrench), and then patted the same place on the object with his hand.
- 3) The fact that this place seemed a lot darker at the time of this viewing drove a strong AOL of suspicion that the work he was doing was not "authorized". This drove further suspicion that he might be there to sabotage the object. ALL this is AOL driven, but seemed to "feel right" at the time, so is mentioned at this point.
- 4) Other objects on this same date seemed to be located in an open area, arranged in a small portion of that larger structure, and sitting on the floor in boxes. The entire place seemed to be quite dark, except for some small points of light high overhead (AOL: like light coming through painted windows). There was a person there, but this person had the EI of "I see nothing!" (like Sgt. Schulz would say on "Hogan's Heros", whenever he saw something he didn't want to

suspicion is analytical

~~SECRET~~

SUN STREAK

acknowledge or be responsible for knowing).

b. July 10, 1987:

There were no perceived changes in either the objects or their location.

c. July 19, 1987:

- 1) The objects were perceived as ~~being~~ opened boxes with flaps sticking up, still in the same location.
- 2) Activity at the site was perceived as the carrying of the contents of the boxes to a location (off to my right), where they would be listed and checked. No other activity was perceived at this time.

d. July 23, 1987:

The tasking for this part was to describe the "objects", but I was again located in the grey room, this time back to its originally perceived brightness. ~~Object #1~~ was there with what was perceived to be an open square or rectangle in its top (see manuscript, P.7). There were ~~rumbling~~, ~~hissing~~, and ~~clinking~~ sounds.

e. Destination (unknown future time):

not for you analyze

~~There is some confusion on my part whether or not the perceptions received here are AOL or valid. The objects are seen as being "scattered" to at least 3 locations:~~

- 1) Several objects (the majority of them) are perceived as being located at an area of interface between the ~~desert (dry, sandy, barren) and a large body of water.~~
- 2) ~~One object is perceived as being on board a ship.~~
- 3) A few objects (1-6) are perceived as being on some kind of a boat which has widely spaced planking running along its deck. This was first AOLED as a submarine, but might also be a small surface craft of some kind.

3. Viewer's critique: The information gained during this session had a very "good and valid" feel to it. The trouble is that even the AOLs had the same feeling. I am therefore not really comfortable about placing ~~any~~ objective evaluation about validity on the information gained.

Thanks
