SECRET/NOFORN - SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8715	SESSION NUMBER: 4
DATE OF SESSION: 13 OCT 87	TARGET COUNTRY:
REFERENCE:	MISSION STATUS:
TECHNIQUE UTILIZED: CRV	SOURCE IDENTIFIER: 011

1. (S/NF/SK) Monitor Tasking: No change in tasking; the question of "product use" remained unresolved and was to be readdressed.
2. (S/NF/SK) Source Tasking: The monitor directed the Source to begin the session in Stage I with an exploration of the "product's end use". The remainder of the session was utilized to further explore the percepts resulting from this initial cue.
3. (S/NF/SK) Summary: The Source's summary is attached.
4. (S/NF/SK) Comments: This session represents the monitor/viewer's best shot. This monitor is of the opinion that a better product could result if the tasking is subject to refinement.

SECRET/NOFORN - SKEET CHANNELS ONLY

CLASSIFIED BY: DIA-DT
DECLASSIFY : OADR

SESSION SUMMARY

SESSION: 13OCT87, 1014-1126 hrs

First impressions were of something hard, something with many angles although there was also a feeling of curving. Whatever this is, it appears to be man-made. It is dark or black in color and there is a back and forth or zig-zag motion associated with it.

Associated with this target, or at least co-located with it, is an object that is cylindrical and round and looks like a big doughnut. It is hard, grey in color and feels metallic. Associated with this object is a circular motion, an upward motion, and a downward motion, all taking place simultaneously. There is a feeling of lightness, soft, gaseous; sensations of choking, burning, but odorless. There is also a feeling of coldness... supercold.

While trying to follow the target back to its origins there is a point at which something is flashing or pulsating, like a strobe. There seems to be a fine, powdery substance. A feeling of processing, refining and storage. Also feel that this substance is dangerous, poisonous and chemical in nature.

The location of this target appears to be in the northern hemisphere, not too far from the equator and in the same line as the west coast of North America.

The raw materials associated with the target is a hard, lumpy, clay-like substance that appears to be some sort of mineral. It is brownish, red-orange in color and stains the fingers when rubbed. The area is hot, dry and rocky. There is also a ^{gray} powdery substance that appears metallic.

The active ingredient associated with this target seems to be a liquid, synthetic chemical, a very volatile solvent. It changes from liquid to gas very quickly.

COMMENT: I am getting a feeling that there is something "fishy" about this target... a feeling that somebody is not being up-front, or honest about this requirement.
