PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8717

SESSION NUMBER: 6

DATE OF SESSION: 14 JAN 88

DATE OF REPORT: 19 JAN 88

START: 1326

END: 1426

METHODOLOGY: CRV

VIEWER IDENTIFIER: 018

1. (S/NF/SK) MISSION: As a follow-on to subsequent sessions, 018 was to describe the overall or general purpose of "future activity" at associated with the site.
2. (S/NF/SK) VIEWER TASKING: 018 was told simply that this was an operation which had been worked in the past, and that the session would begin, without cue, in Stage 4.
3. (S/NF/SK) COMMENTS: Although the results of the session seem have a good "feel", the data remains abstract. More work needs to be done.

2. (S-SS) Tasking:

a. Describe the site.

3. (S-SS) Results:

a. Several perceptions were gained which centered around a cupped shaped "thing". Several partial drawings (see pages 1, 3 & 7) were perceived, but the most complete is on page 6. This sketch shows only the right side of the "thing", viewed from inside the cupped area, looking at a vertical "thing" in the middle of the cupped area.

b. The central "thing" seems to not be attached directly to the center of the cupped area, but somehow separated from it. There was the slight perception of "activity" or "energy" at this point.

c. The overall impression of the site was that there was a "sideways" sweep of energy across the area. This sweep of energy was perceived as developing swirls and eddies as it passed the site. This was not followed up, and nothing further was perceived concerning this.
