

- ① The things that we would like to answer concern your references to site configuration and the purpose or function of this site. Do you need coordinates (No!)
- ② What are you doing Paul? (shaking head), "The size of the building is out of proportion etc etc -- Paul, objectify those comments."
- ③ Make a time line. Move along that time line to a point when the most important aspect of this site is questioned. Tell me about the site in this future time.
- ④ "I get the feeling of importance one year from now." OK, lets give that a label "one year from now" discuss the site one year from now.
- ⑤ The concept of shielding something inside interest me from an aesthetic standpoint. How would you identify the thing being shielded?
- ⑥ There seems to be a lot of information about different areas. Perhaps this would be a good time for you to review your material and to prepare an interim summary.
- ⑦ When we return I want you to review your timeline and to seek out a time, if it exist, when all these components come together and function as they are supposed to.
- ⑧ "I'm not sure its ever used" OK - perhaps you can access someone there who could help you understand this site.
- ⑨ "AOL spaceship feels good but I'm not sure if its AOL." Maybe you could stage 5 it to resolve no question.
- ⑩ "AOL Mars mission" Paul that seems to be a drive or a strong signal. Do you need to work that out. "Actually no because at this stage I usually can't tell myself if its drive"

④ Paul I am having some difficulty putting together two apparent conflicting concepts - 1) Preparedness, no use
2) The idea of an object of some sort of space vehicle.
"1.1.1. 5472 that"

② The last thing before summary then - will be the Building within a building concept - I would like you to stage 6 that as clear as possible.

③ Re-read your ^{interview} Summary - make any corrections - you think may be required since the summary was written -
