Project: 8704
Date: 21 APRIL 87
Session: 02
Source: 079

Start: 1305
Sanctuary: 1312
Target: 1314
Finish: _____

Coordinate: 377566 / 752042

Frontload:

"THIS WILL BE A SECOND SESSION ON A TARGET YOU WORKED ONCE BEFORE. FOR TODAY'S SESSION YOU NEED TO, 1ST UNDERSTAND WHERE THE DIRECTION SOUTHWEST IS FROM THE TARGET YOU DESCRIBED BEFORE. ONCE YOU HAVE DONE THAT YOU NEED TO KNOW THAT I WANT YOU TO DESCRIBE THE AREA 6 KM SW OF THE AREA YOU DESCRIBED BEFORE."

Notes:

- ① NICE DAY - SPORADIC SUN
- ② SOURCE BACK FROM LONG WEEKEND (3 DAY)
- ③ NO KNOWN OR STATED INDEMNENCIES.

~~SECRET~~ NOFORN
SECRET CHANNELS ONLY

(when filled in)

Draft: _____

2

→ ~~377566/752042 - TELL ME ABOUT THE AREA 6 KM SW
OF THE AREA YOU DESCRIBED BEFORE...~~

★ UMM, OPEN AREA, I FEEL LIKE I'M RIDING OR DRIVING, THERE IS MOVEMENT WITH AN OBJECT, IT PUSHES AROUND, IT CAN GO VERY FAST, OR VERY SLOW, SMOOTH, VERY SMOOTH, ENERGY SEEN AND UNSEEN, PLACEMENT, CLENCHING, SQUEEZING, PEOPLE - BUT, I'M IN THE OPEN AREA

→ OBJECT ENERGY SEEN AND UNSEEN

★ I CAN SEE IT NOW BUT REGULARLY YOU MAY NOT SEE IT, IT IS AN ENERGY THAT SPREADS OVER A LARGE AREA, MAKES ME FEEL GOOD, GOES UP, PUSHES UP, SITTING MEN WORKING, MEN STANDING AND WORKING, MEN LAYING THINGS OUT FLAT, THE PLACEMENT WILL BE FLAT

→ TELL ME ABOUT THE THINGS THEY WERE LAYING OUT

★ THEY ARE BIG, BOTTOM GROUND WORK, BIG PIECES, METAL, BIG, HEAVY WORK, SILVER, PLACING ON THE GROUND, PIPING BUT NOT REALLY, PIPES, SILVER, BOTTOM, YOU CAN PUT SOMETHING LONG ON HERE, RAISING UP, BUT ITS NOT HERE YET, I DON'T KNOW IF THEY ARE GOING TO DO IT.

→ Tell me about the area

★ Hilly, green grass, brown grass, NO OTHER STRUCTURES, THIS THING SITS BY ITSELF, THIS AREA WAS CHOSEN, HIGHLY PROTECTED AREA, HIGHLY GUARDED, SPILLING OVER IS NOT GOOD IF IT HAPPENS, A SPILLING OVER

→ Describe the guards

★ The men working need to be protected. NOT OUTSIDE BUT INSIDE, A SHELTER, A STRUCTURE INSIDE WHERE MEN WORK, ROUNDED, I SEE MEN COVERING THEIR HANDS TO WORK
To ~~work~~ ~~the~~ ~~area~~

3

→ STUFF

★ Containers, big and little containers, a hauling, I don't know how they transport it, I don't see how it's done at all

→ Describe the STUFF

★ Comes from deep inside the earth, from the core, but it's not good,

→ NOT GOOD raw data

★ EXPOSURE NOT GOOD, it makes me dizzy

→ Continue to describe the shelter

★ A SHELTER, A WORKING area only, not elaborate, built fast, serving only the purpose for the men to go there to sort out the containers, not much working papers, deals with the substance, you have to go outside to do the real work, inside to work too, but the shelter was built fast, square, low to ground, rounded too, I feel that I'm in a cave or cavern

→ Cave/cavern

★ Rounded, natural, stony, rocky, the feeling that I am under, closed in, natural and part of the work.

→ Important work outside, describe

★ Men are working outside, there is something flat, the way you can transport --- the men work very close to the ground, touching, weighing, kneeling, what is on the ground is important, they bend over, pick and smell, there is a laying over, a covering, flat, this could be a way of transporting, the work is highly guarded. I don't even

4

(continue)

- ★ Know if this may even leave the area, I don't know how it could
- Important stuff on ground
- ★ it very important, when its weighed its very tiny, millis-grams, smaller
- STUFF on GROUND continue
- ★ Why they smell it I don't know because its odorless yet invisible, that's why they weigh
- Invisible raw data
- ★ its there but if you were to encounter it you would not see it, you could breath it, protection, a covering, the men are covered, the men wear white sometimes -
- Scavenger
- ★ Wait - there's studying that goes on about this, modern use, come about recently, you mixture of the earth, what's natural and what man made, "Red power"
- Red power raw data
- ★ The substance is powerful and red like danger, it is being studied and it -- man made it, man developed it, through the knowledge of what the earth had to offer
- Pause now - Listen - Relax and Listen - Before you tell me of another place - Be certain you are better off of that place -
- ★ shooting out, a leg shooting out, movement, back and forth scanning efforts, going around and around, covering a large tremendous arc, outside, more of a shooting out - an object that you want

5

→ Tell me about the object

★ Goes around, rather simple, man made, The power is not in the object, it's what comes out, tall, narrow, at the top it's circular, moves around, scans

→ Continue

★ stands straight up and down with a circular part, all the heat comes from this part, penetrates the area, it goes out all over the area, very large area, the reason it is placed there is to bring notice, I don't think this thing protects, no warnings, it's there to give notice - big - now it sends out energies, reminds me of songs - it sends out energies but doesn't receive - it's timed - what goes out is preplanned, it's controlled, to the exact

→ Go to the time when it goes out - describe

★ A man sitting like he is talking to himself - he is sitting in a square area, he talks out, talks out or works there, There's -- he knows what he is going to do, messages, oral, humph, oral messages - oral communications, loud talking - this is a method that works very well - me -- this is rather old, rusty, the method is old but the way it is being done is considered modern. Where the man is working I get a dusty feel, scanning, monitoring -

→ Scanning, monitoring

★ Bring out, sending, electronically works, big part moves back and forth, the man monitors messages, oral messages - This is old - it's been here for quite a while - IT was set there because of the area - because of certain way it can work in weather conditions, earth, wind, air - different layerings of layering affects, chosen because of environment not really but the way the air is - it's isolated.

\$

→ Continue to tell me about this area

★ Low hills, object is in a circular area, you look down from the hills to see, the important reason for placement here is because of the air - and because of its ability to reach out to important areas everywhere, it receives - but it doesn't tell anybody it receives, one of the reasons its put there, its a secret. Some people think it was put there for another purpose, the people who own this -- its not their land, an accord -

→ Describe this object

★ Big, very big, scouts a large area, yet they are easy to put in, easy to place, hard labor but they are mobile + world wide use, carefully picked areas to serve somebodys area, strategic placement, best info you can get - mobile

→ mobile now data

★ You can place them - and certain parts are mobile, you can take them down, discontinue their use or move it - expensive -

→ other structure

★ A tiny shelter near it, men working ~~its~~ inside, not the best working conditions but the men work inside, they monitor - they do the monitoring, a connection between men inside working ~~at~~ ~~near~~ the object, men sit and listen, talk to themselves, give the impression, they work by themselves, sit near each other but their tasks theirs alone

→ Back outside important stuff

★ I don't see it now, not here

6/3

→ The object, describe the object in use - access someone for the words

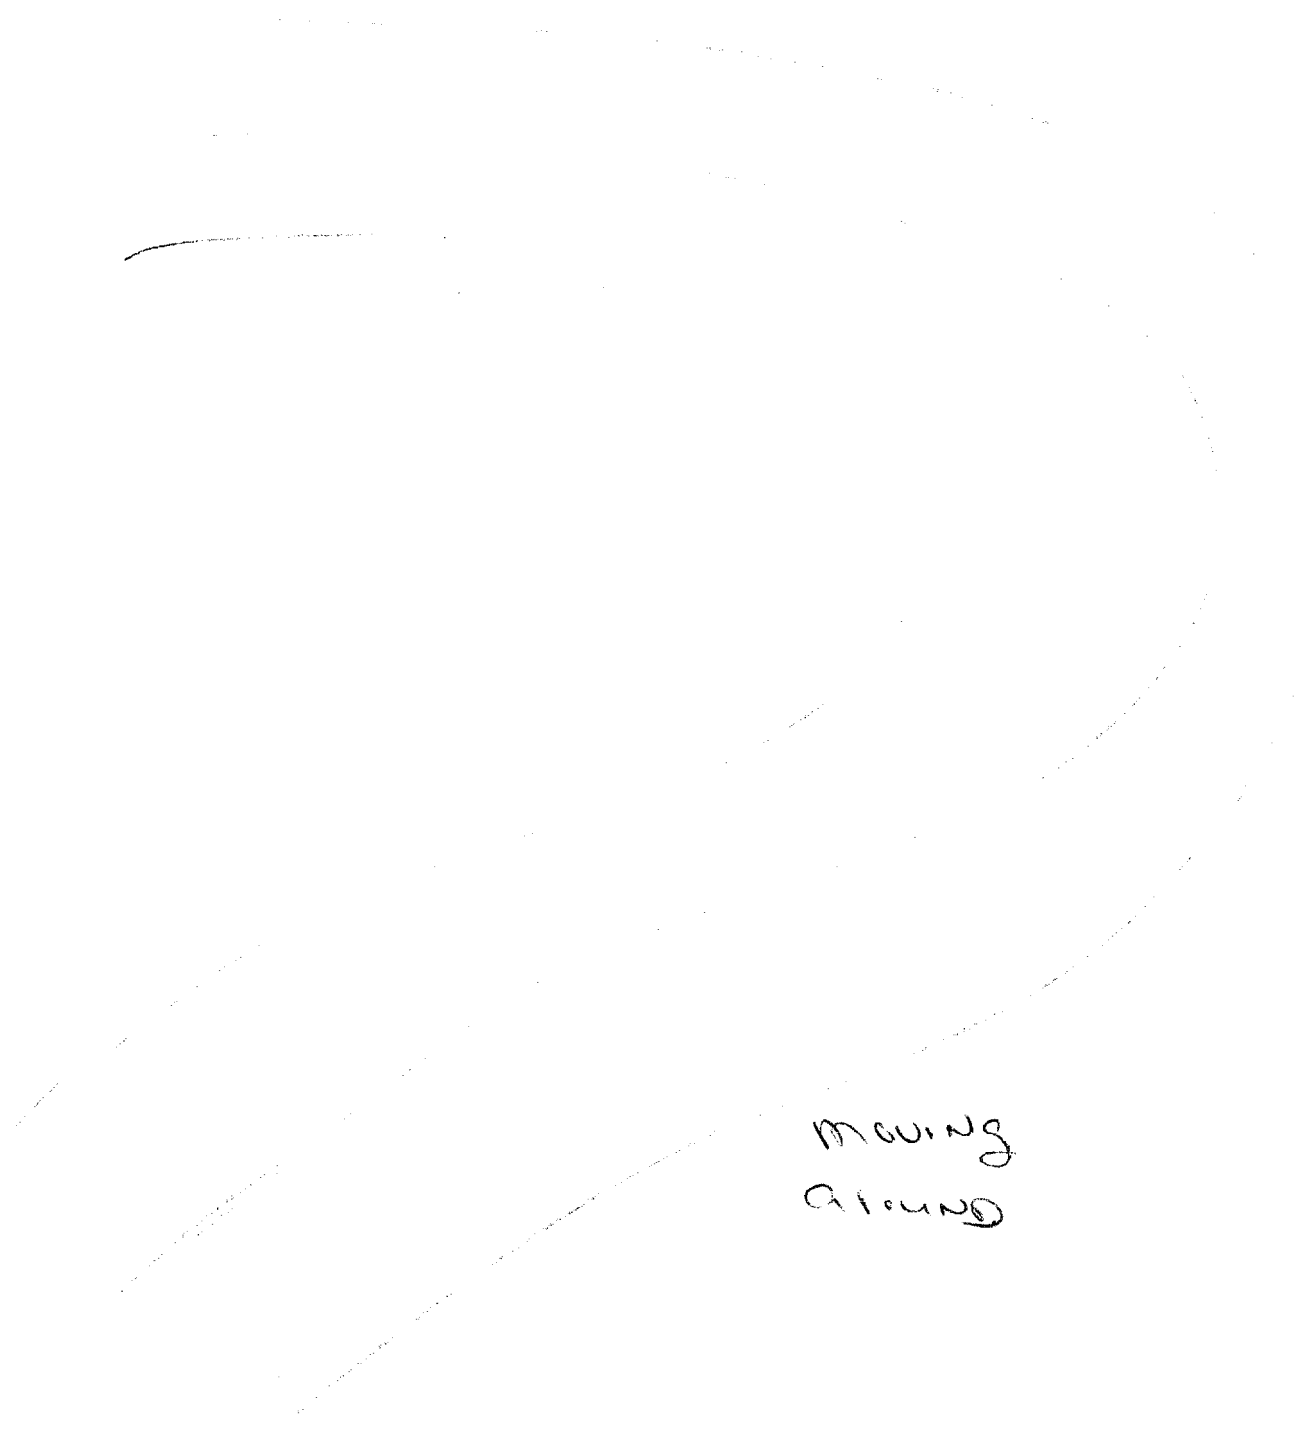

★ Expanding, Expounding, breaking, delimiting, locked up, locking up, sides are locked up,

→ Ask someone for the words to describe this object

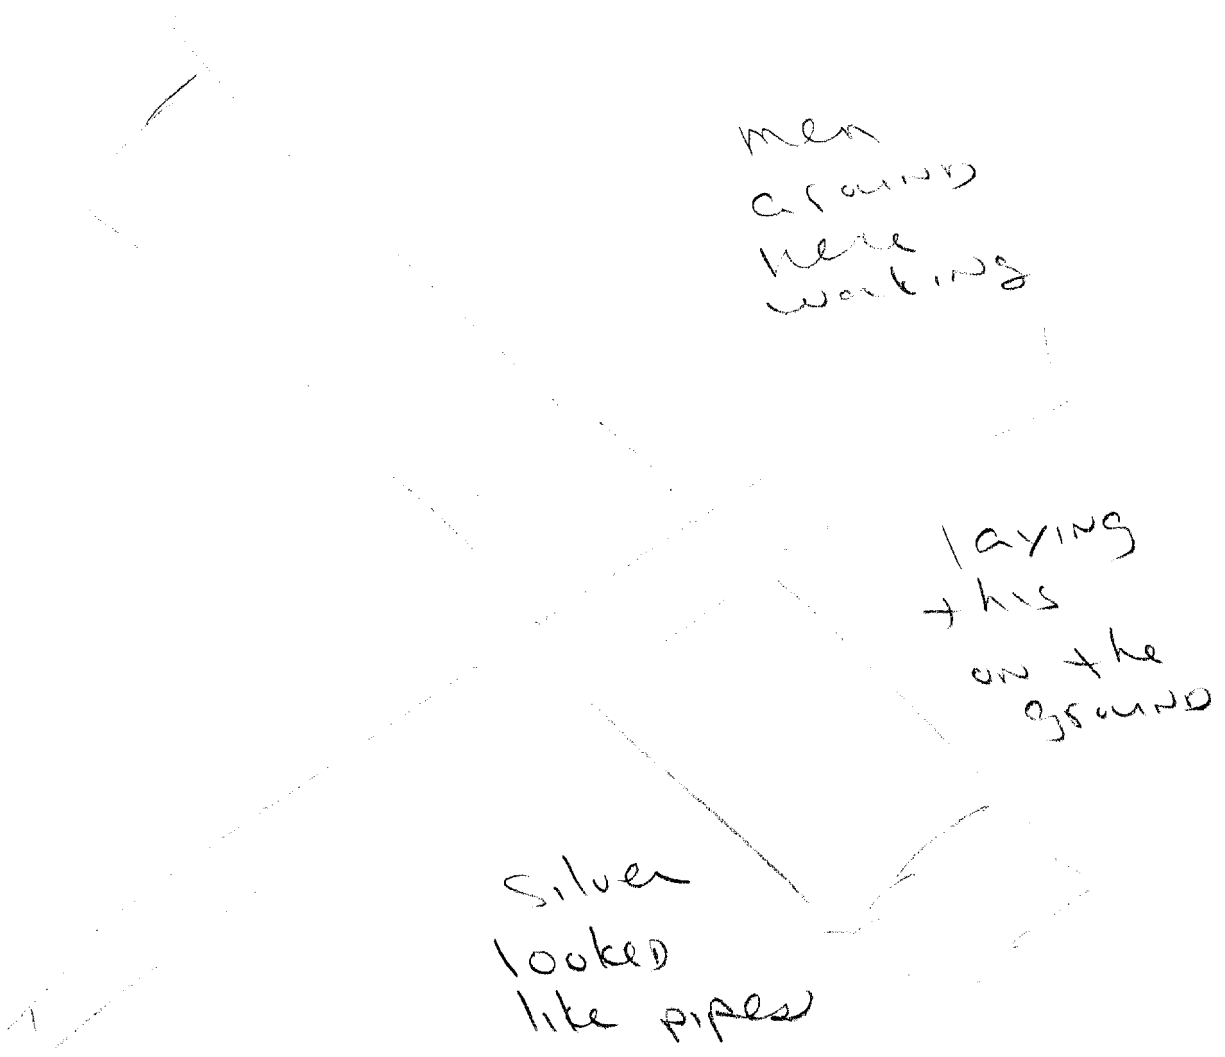

★ Delivery, business, only allowed to take to certain other areas, limited as to where you can use it, rules, transported to some areas, strict rules, fined if you don't obey, business, ownership, marketable, some people have hard time accepting this, against it, like it's against religion/beliefs -

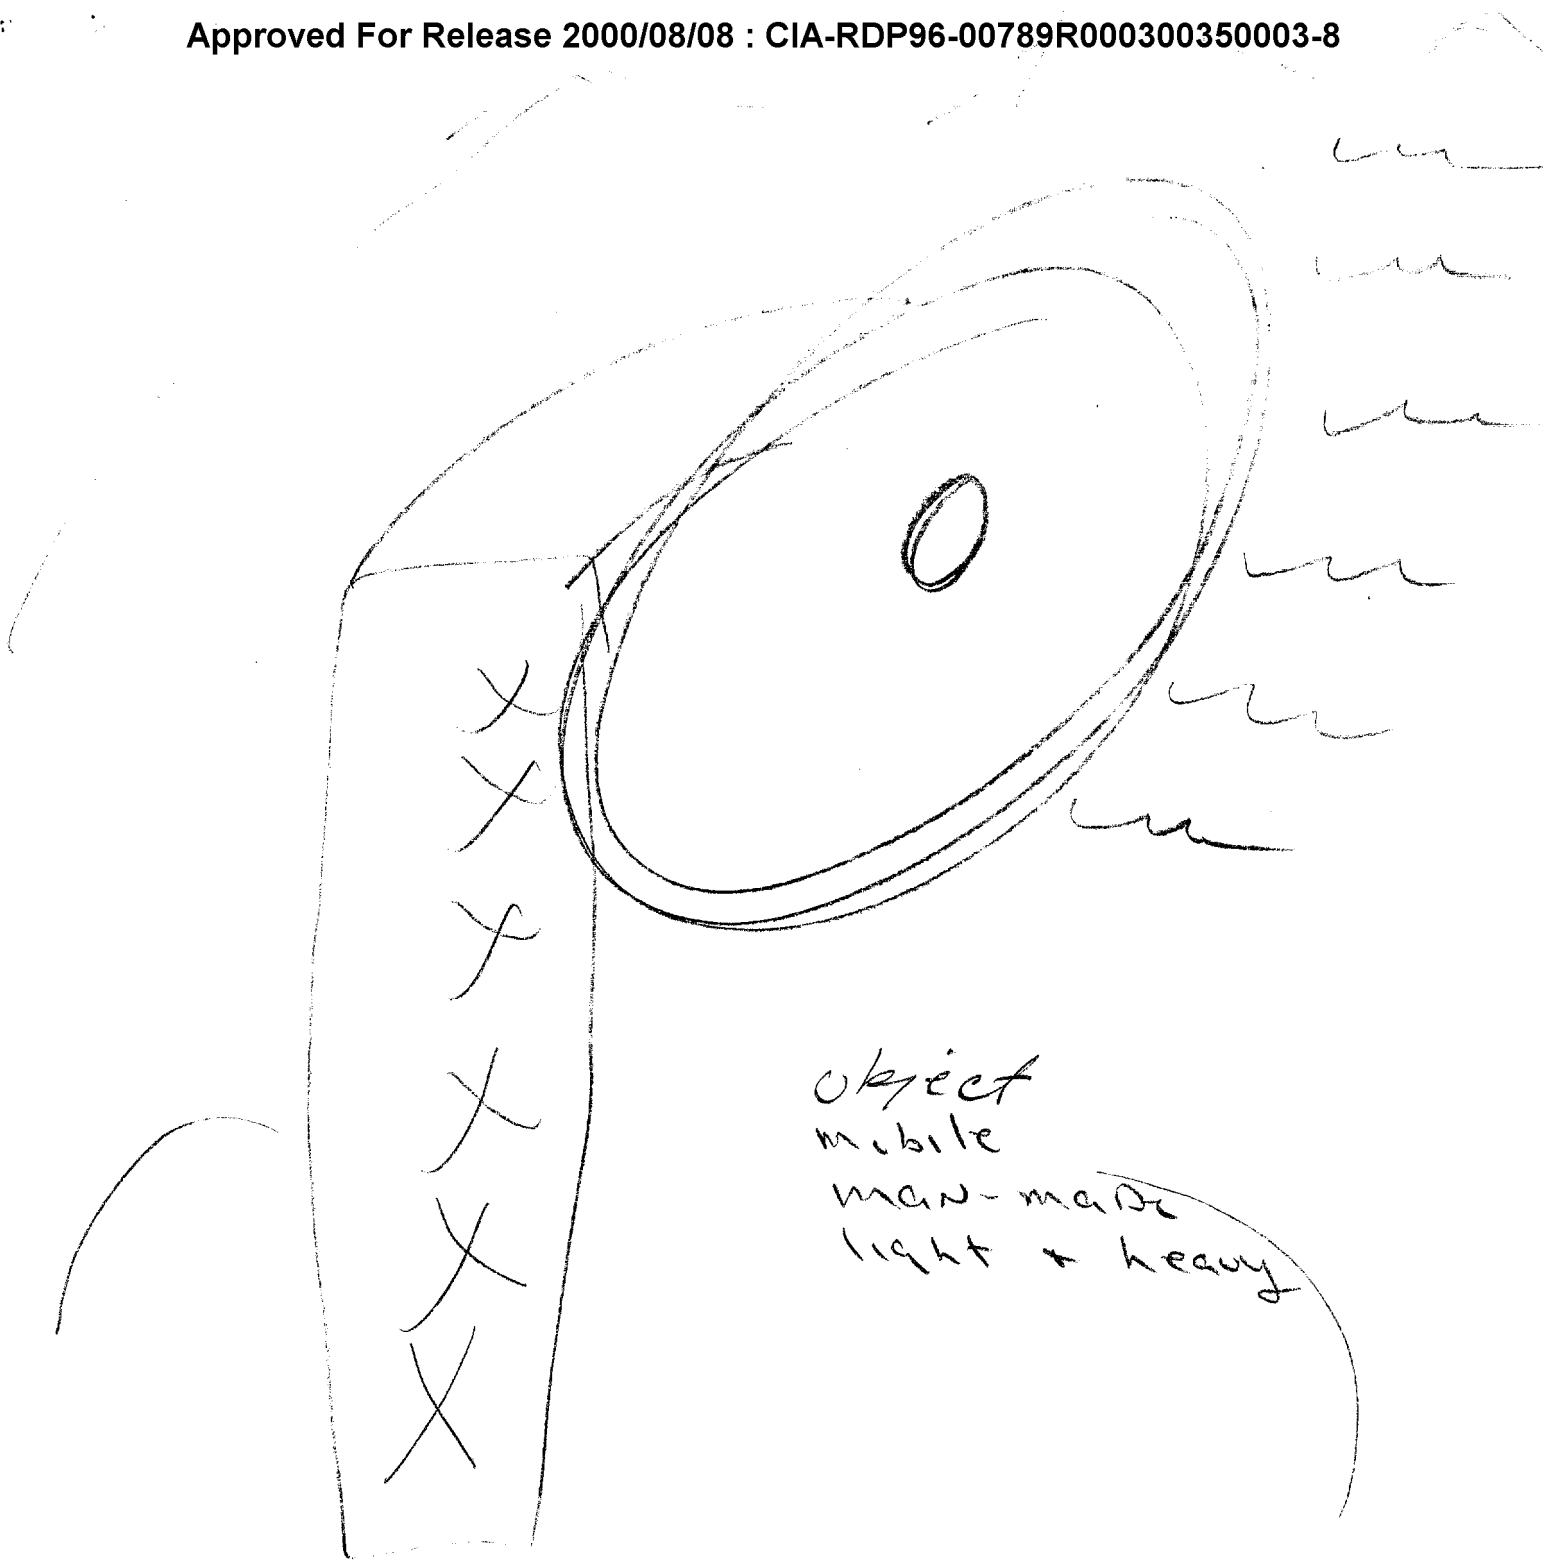

→ Pause now - stop reporting, focus around the object, get to know it well -

Moving
around

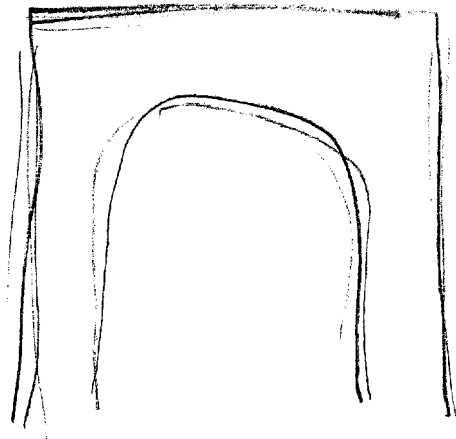

Object
mobile
man-made
light + heavy

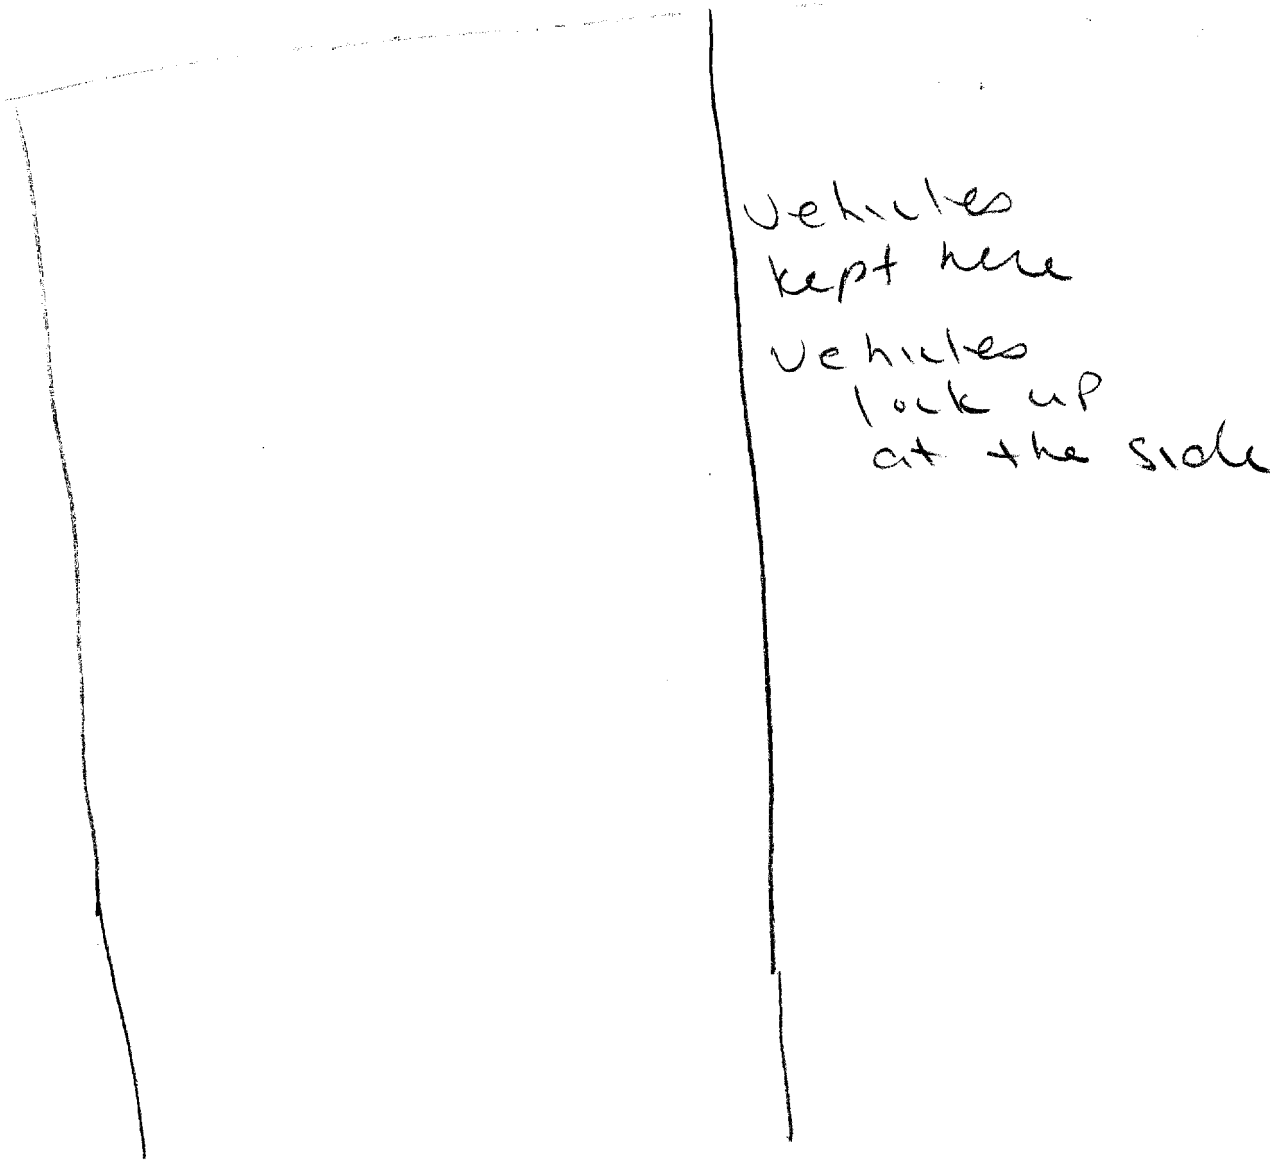

structures
men working
in here

□ the stuff

shelter
very low
to ground

very
guaranteed

I first sensed moving. I was moving rather smoothly and I was riding something. I liked it but it made me dizzy.

I felt I was in an open area and it was not crowded. Few structures. It was a highly guarded & protected area.

I saw men laying something flat on the ground. I sensed a small shelter that reminded of a cave that men worked in. I didn't sense much paper work but there was stuff? in a container. This stuff ~~is also~~ was also outside where the men were working. I could not really see this stuff but I felt it. ~~It~~ Men weighed it and smelled it but it was odorless. It has no smell. It has power and you could breathe it & not know it. I sensed men covering their hands. I sensed that this stuff came about in modern age. It comes from the earth's core. There are studies on it.

~~taken~~

I then sensed an ~~structure~~ object that was man made. Men put it up. It was rather mobile. It ~~is~~ was a sensor. I felt heat. It stood up and then it was raised and it transmitted out to a large large tremendous huge area.

I felt that the equipment? was rusty. I felt this had something to do with modern age

but the methodology was old.

At first I kept picking up this object was scanning an area. I saw a man working and it looked like he was talking to himself. I kept sensing that this object was timed and ~~preplanning~~ preplanned.

I sensed oral communication.

I then sensed smaller structure around this large object and I saw men working. Sitting. It looked like they were talking to themselves. It was here that I picked up some sort of monitoring. I then picked up a connection between them + the object and I then sensed the object was a receiver also.

I did not know at first why this object was placed here but it had something to do with the air and how you can send out + receive certain areas placed on its strategic location. I also sensed

that the people who own this do not live on the land. Do not own the land. E.

~~An access en her +~~ there was an access.

When asked to find someone to talk to, I felt I was someplace different. Somewhere where vehicles were kept and these vehicles locked up at the sides.

When I spoke to this
person, he talked of delivery
AND said that certain rules
& regulations applied AND if
you did not obey, you could
be fined. Also, I sensed
delivery to only certain
territories. I also sensed
a leasing or renting of some
sort. He also said some
people are really against this
as part of their belief system.
