

SECRET/NOFORN-SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

CRV Session Procedures Report (S/NF/SK)

```
Control Number      : 8706
Date of Session     : 07Apr87
Date of Report      : 07Apr87
Source Identifier    : 003
```

1. (S/NF/SK) Tasking: See tasking data sheet, attached. No further instructions received.

2. (S/NF/SK) Session: A good deal of session time was spent discussing source PI's (psychological, not physical). Nevertheless, session felt copacetic to monitor; rapid target acquisition combined with many indicators. Source suspected possible AOL with regard to the idea of SDI, but said that it did felt like signal line. Source produced the word "unfinished" early in S4 and was instructed to turn his attention in that direction because he was probably on the target.

3. (S/NF/SK) Summary: AI of "fascinating". A "technical" structure under construction in a remote area with green hills and water. [It is huge, airy, flat, tapered, rounded with a platform, (perhaps for landing helicopters).]? (See source sketch in session notes). Installation involves complex electrical/electronic systems, as well as a "core". Source perceives this site to be "the answer to SDI". See session notes for amplifying data.

4. (S/NF/SK) Feedback: Source was informed that he was probably on target but that the monitor would require additional instructions in order to proceed.

ALB "scientific fiction"

Core

Central

obscure

2 meanings

→ 4 1/2 Core = central self-contained part of family - Absolutly essential for functioning. Could function with other component missing but not this.

"They" are working on the Core.

Nuclear Core? Impression that core also refers to dedicated power source, stability, nuclear

Als/5 1/2 Impression of whole structure being "lit up" with radiant energy + Flickering, pulsing both emanating + receiving; pulsing both in hostile mode
Idea of space attack

✓ feelings not necessarily visual

Avul BK particle beam etc.

like its under attack and attacking back! ~~not~~ necessarily with some "things/method"

Site ^{under construction in a remote} ~~Approved For Release 2000/08/08 : CIA-RDP96-00789R000300420001-2~~
 area with vegetation + water nearby. Structure is huge, very
 flat, tapered, rounded with a platform involved - perhaps
for landing helicopters. Construction is irregular or unplanned -
 material - mainly metal is being up to work on structure both
above + below platform. Complex electronic + electrical systems must
 be in place before rest of work can be completed. Structure
 involves weapon syst. control with a shielding concept. Impression
 of conductor → response to SDI - words is perceived or offensive.
 Large loads of radiant pulsing energy both being sent and
 received + defended against seems an important concept of
 the site. Site is vertically oriented primarily in a
 non-physical sense, and is designed to operate in
 wide scope over immense distances.
