SECRET/NOFORN

PROJECT SUN STREAK

WARNING NOTICE: SENSITIVE INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8801	SESSION NUMBER: 001
DATE OF SESSION: 17 Feb 88	DATE OF REPORT: 21 Mar 88
START: 0840	END: 0955
METHODOLOGY: CRV	VIEWER IDENTIFIER: 095

1. (S/NF/SK) MISSION: Acquire and Describe target structure and contents at coordinate 113096/532189.
2. (S/NF/SK) VIEWER TASKING: Same as above
3. (S/NF/SK) COMMENTS: Viewer described a tall structure with an unusual angular shape. Inside this structure are two areas. One area contains offices/work areas. The other area contains machinery cables and wires, which reminded the viewer of a machine shop. The people here are involved with assembling or building something. (AOL - like a prototype). Viewer also describes a "key person."

- Explore in Stage 4 1/2 the essence of assembly/building something
- Describe the something (as in prototype)

SESSION SUMMARY
17 FEBRUARY 1988
VIEWER 095

The site is a structure with an unusual angular shape. The structure is divided into compartments/sections. The inside of section of interest, has varying vertical components. Some areas are divided into normal sized stories, another is several stories high. In one of the several story high room is lots of machinery, cables and wires. Some the equipment is old, some new. Something is being assembled in the room. In another part (normal height ceilings) of the building are offices.

People who work there are divided into sections (by function?) and work on different specific areas (appear to be highly specialized). The program the people are working on involves the assembly or building of something. Strongly associated with the program is a middle aged, blonde, organized precise, brilliant, highly egotistical scientist. He has been given carte blanche for the program (has no trouble obtaining money). This person's major concerns are production schedules, deadlines, requirements, data review. His approval on items is very important to progress.
