

memorandum

DATE: 2 September, 1988

REPLY TO
ATTN OF: DT-S

SUBJECT: SESSION SUMMARY (C/SS)

TO: DT-S (ATTN: 095)

1. (S-SS) Statistics:	Viewer:	018
	Session date:	2 SEP 88
	Start time:	1058
	End time:	1132
	Mode of operation:	CRV
	PI:	Cold room
	AV:	None

2. (S-SS) Cuing: "Describe the target problem".

3. (S-SS) Results: The target problem generated impressions of the following concepts:

a. The sudden release of pressure/tension, and the resulting movement of some object.

b. A change in speed and motion (as in acceleration and/or deceleration), with the absorption of energy being one of the possible end results.

c. The influence of that which moves on the space and/or material around/along its path (see sketch, page 6). There was also the recurring perception that its path is curved, rather than straight.
