

UNITED STATES GOVERNMENT

# memorandum

DATE: 15 May 1989

REPLY TO  
ATTN OF: DT-S

SUBJECT: SUBJECT: SUN STREAK Report - 8914-I: Supplemental

TO: BRANCH CHIEF, DT-S

1. (S/NF/SK) During the period of 9 May 1989 - 12 May 1989, remote viewer O11 conducted 2 CRV and 1 SRV sessions in an effort to determine "the most unique aspect and function of the target site" at coordinates 300652/970735 and "provide an overhead perspective of the target area." Enclosed at TAB A are O11's sessions. TAB B contains his overhead sketch.

2. (S/NF/SK) O11 reported the following: The "most unique aspect and function of the target site" involves a large, tall, blocky-looking building that contains two objects of interest. One is a square, smooth, solid, heavy metallic cube that contains significant mass. The material is very heavy like lead but is hard, not soft. O11 perceived this object as being "just there" and did not perceive it interacting with anything or performing any specific purpose/function. The second object is an unusual device. It is very large and tall and spins around a vertical axis, counter-clockwise, similar to a gigantic gyroscope. A sketch of the device is at TAB B. The device spins at extremely rapid speeds. The faster it spins, the more this device appears to flatten out in the center. O11 commented that he had the impression that this "flattening out" was more of an optical illusion-type effect rather than a reality, which is caused by warping time and space. As this device reaches maximum RPM, waves of energy are drawn into the center/core, along the vertical axis, and are condensed. The energy is electromagnetic in nature and appears to be being drawn from the ultraviolet (purple) end of the spectrum. As the device spins, the more concentrated and condensed this energy becomes. Concepts associated with this object/device are: research, energy, space, time, warping of space and time, atomic, sub-atomic, and the idea of a break-through in physics. This energy/force seems to be related to the force we call gravity, but not gravity as we describe and understand it at present.
