PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8914-I	SESSION NUMBER: 2
DATE OF SESSION: 890420	DATE OF REPORT: 890421
START: 1430	END: 1505
METHODOLOGY: CRV	VIEWER IDENTIFIER: 003

1. (S/NF/SK) MISSION: Describe the most unique aspect and function of the target site and provide an overhead sketch of the target area.
2. (S/NF/SK) VIEWER TASKING: Coordinates. Later instructions were given to conduct a stage 6 exercise to sketch an overhead perspective of the site. The cue "most unique aspect and function of the site" was also given.
3. (S/NF/SK) COMMENTS: Viewer appears to be on target. Next session will be spent obtaining more information on the most unique aspect and function and also developing a better overhead perspective.
4. EVALUATION:

Summary of Information

Site is a structure on land, that is large, many-dimensional, and involving small curving, rounded, domed, objects. The structure itself is functional with appearances that are "like industrial." It has some sort of unique dimensionality about it. It is part of a larger site. Something goes on inside it, which involves people and activity. There are several "sub-buildings" that comprise this whole structure--it is one building composed of parts--a composite. People inside it are organizing, coordinating, associating, bringing together things and ideas. Among other things, there is a sense of electricity or power that is "free" in some way, yet controlled--the sense of flickering, sparking, glowing, as seen down a long, dim hallway. Also the impression of a tall, pockmarked wall. People come here and get all engrossed in what they're doing. AOL/S of R&D. SVI sketch of the site revealed the structure of interest centered, to the north (as oriented on the paper) some sort of boundary, though not necessarily an obstacle (perhaps a road); to the east a large flat area; SSE an very tall structure which "like" a tenant office space houses several different activities, none of which are especially interesting; to the south and SW a few incidental buildings; to the west a quasi semi-circular array of structures which have something to do with

the building of interest, conveying some sense of focusing or directing (ADL/S "reminds me of an EMP test site"). The structure itself has some sort of wider flat area affixed to its NE corner.
