PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: B915 SESSION NUMBER: 01
DATE OF SESSION: 1 MAY 89 DATE OF REPORT: 2 MAY 89
START: 1030 END: 1120
METHODOLOGY: WRV VIEWER IDENTIFIER: 079

1. (S/NF/SK) MISSION: Determine and describe the key function and supporting activities at the target site.
2. (S/NF/SK) VIEWER TASKING: Viewer 079 tasked with the requirements outlined in Para 1, above.
3. (S/NF/SK) COMMENTS: No inclemencies noted. Summary of information is attached to this report. Information will be refined in a second session.
4. (S/NF/SK): EVALUATION:

HANDLE VIA SKEET CHANNELS ONLY

SUMMARY OF INFORMATION

The target area is a Soviet military complex.

The target is an object described as an instrument capable of executing a sweeping motion. *The target has been under testing.*

The object is associated with chemical warfare under tactical conditions.

Tubular objects are associated with the object and possibly interact with it in some undetermined fashion.

The object is associated with a revised technology. ~~The INF Treaty signed by the US and the USSR is a factor affecting its use and outcome.~~

The presence of chemicals stored in barrels is associated with the object. *Conductivity ass of the water & chemicals in the war.*

The tubular objects are sent to Soviet satellite countries; for example the tubular objects have been sent to the southern section of Czechoslovakia for training purposes.

V: 079
S: 01

The site is a Soviet military complex. There is a large object here that has a sweeping motion. This large object sweeps something into tubular objects. These tubular objects are then transported out into Soviet territory where they are used for Soviet military exercises. One such location is the southern portion of Czechoslovakia.

The activity of all this concerns chemical warfare and is placed under tactical intelligence.

The large object is not advanced technology but is rather an old system with modifications being made to it so that it can play a role in nuclear and chemical warfare. The sweeping motion enhances performance.

*movement that has
as sweeping motion
w/ tact application
associated w/
chemical warfare*
