

~~SECRET~~/NOFORN - HANDLE VIA SKEET CHANNELS ONLY

PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

-----  
PROJECT NUMBER: 8819                      SESSION NUMBER: 1  
DATE OF SESSION: 31 OCT 88              DATE OF REPORT: 1 NOV 88  
START: 1415                                END: 1510  
METHODOLOGY: SOLO                        VIEWER IDENTIFIER: 003  
-----

1. (S/NF/SK) MISSION: For this initial session, the objective was for the viewer to acquire, describe and conduct a brief exploration of the target area, (depicted in an overhead photo).
2. (S/NF/SK) VIEWER TASKING: Coordinates only; (also, the viewer was informed that the target was not 'drug related').
3. (S/NF/SK) COMMENTS: Good probability that 003 acquired the site. Subsequent sessions will be monitored, with the intent of 'steering' 003 around the target area (after Stage 6 contact/sketching) until mission EEI have been fulfilled.
4. (S/NF/SK) EVALUATION: [ ]

SG1J

~~SECRET~~/NOFORN - SKEET CHANNELS ONLY

CLASSIFIED BY: DIA-DT  
DECLASSIFY : OADR

First perceptions of site are being among tall, smooth cylindrical structures with long, relatively thin straight constructs that make sharp, precisely engineered angles to go off somewhere else. Structural extent seems almost vast, with large area covered by large structure/objects. Seem to go off into the distance, but can't see far because they get in the way of sight. Moving amongst them reveals some changes in sizes and shapes as they go on. Interconnectedness, relaying, movement are aspects here, as well as a sense of industrial and technical site. Feeling that this is all inside. When one backs off thru the wall one discovers a structural shell and bright sunlight. Exterior is white and beige colored, thin, parts are lined or corrugated. There is access to the interior. Sense of height and cool--almost cold--"like" winter or late fall in cold, brisk climate. Clean smelling air. Site is involved in some project connected with "finding out". There is either no military connection, or it is far removed from any military connection. Engineering and technology are heavily involved, as well as controlled power. No major sense of danger connected with this site. Components and elements could be dangerous if grossly misused, but as constituted it is not threatening. Sense of something involving long distances here (A/S "like" long range radar). Setting is non-US, non-western hemisphere. Sense of being long ways from here, but probably northern hemisphere.

~~SECRET~~/NOFORN

SOLO TASKING: Acquire and describe the site.

COORDINATES: 696910/136160

Set's away tall, smooth cylindrical structures w/ long, thin  
(relatively) straight constructs that make sharp, precise  
engineered angles to go off somewhere else. Structural exterior  
Seems almost vast, as if a large area covered by large structures/  
objects. Seem to go off into distance, but can't see far

542 (cont.) because they get in the way of sight, having amongst them vessels ~~show~~ some change in size & shape as they go on. Interconnectedness, varying, movement. Sense of industrial or technical site. Feeling that this is all, in spite of the fact that one discovers a structural shell and bright sunlight. Exterior is ~~light~~ white & beige colored, thin, parts are lined or corrugated. There is a sense of height and cool - almost cold. A/S "like" whistles or late fall in cold, brisk climate. ~~Never~~ smelling air.

A2 B4  
interests

542 Whatever this sight is, it carries some sort of unusual interest for me. It's involved in some project connected with "flying out." There is either no military connection or it is far removed from any military connection. Engineers & technology heavily involved, as well as considerable power. No major sense of danger conveyed w/ this sight - components & elements could be dangerous if grossly misused, but as constituted it is not threatening. Sense of something involving long distances here (A/S "like" long range radar). Setting is non-U.S. - non-w/hemisphere. Sense of being long way away from here, but probably N. Hemisphere.
