WORKING PAPER

Project: 8927
Date: 890822
Viewer: 018
Session: 01

SUMMARY OF INFORMATION:

1. (S/NF/SK) The issue of specific intelligence interest : This EEI was not adequately addressed in this session, and will be the subject of the next session, when higher stages are reached.
2. (S/NF/SK) Immediate surroundings of the target: The area appears to be physically very ^{complex.} There is rough ground and structures, with an overall ambience of everything having been extremely well and efficiently "laid out", so that all parts of the area interconnect and "fit" together in a very intricate manner. *(1818 Cmt - Well-planned executed.)*
3. (S/NF/SK) People directly associated with the target: There was only one perception of an involved human; a man partially dressed in a black uniform. His uniform hat was of the "flying saucer" type, but appeared to be octagonal in shape (if seen from above). He was located on steep sloping ground which led directly down to a fenceline. He was engaged in an activity which appeared to be "checking" the fence, or the ground under it. The topic of "people" will be delved into more deeply in the next session, as well.
