SUMMARY OF INFORMATION

The target area is made up of numerous structures. The principal structure looks like it is vented in some way. There are aspects of plastic, metal, louvers, vents, pipes, and cylinders.

The activity at the target is noisy. There is a loud buzzing sound accompanied by pounding and machine sounds. I felt that I was in the presence of a construction site or a building partially under construction with parts of it already completed and operational.

Perceptions of the purpose of the target are that it functions in a government/intel role.
