PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

-----  
PROJECT NUMBER: 8929                      SESSION NUMBER: 02  
DATE OF SESSION: 21 NOV 89              DATE OF REPORT: 22 NOV 89  
START: 1330                                  END: 1435  
METHODOLOGY: SOLO                         VIEWER IDENTIFIER: 032  
-----

1. (S/NF/SK) MISSION: Determine in an [redacted] at a  
geographical location represented by Encrypted Coordinates  
harbors a C3 facility; and, determine [redacted]

SG1A

SG1A

2. (S/NF/SK) VIEWER TASKING: See your sketches and related  
information provided in the previous two sessions. Probe your  
sketches and pursue them until such time as you run out of  
structure(s). Probe right, left, and underneath. Describe the  
nature of the activity in a given area (this may be pursued in  
yet another session.

3. (S/NF/SK) COMMENTS: No inclemencies noted. Need to  
continue to probe within and beyond the input of sketches. A  
Summary of Information is attached to this report.

4. (S/NF/SK): EVALUATION:

5. (S/NF/SK) SEARCH EVALUATION:

SUMMARY OF INFORMATION

The target area has many aspects to it. The main attraction was a structure. There is a great deal of moisture, darkness and dampness. There are stairways leading downward which have metal stairs and railings. These stairways appear to have concrete walls.

There are metal pipes and electrical conduits running overhead and along many of the walls. These elongate the halls in appearance. There is a constant ~~buzzing noise~~ inside this structure. A large cavern or room is attached to the structure (or may even be an integral part of it). There are also large heavy metal doors closing off different areas of the structure.

I felt confined at the site, buried, had difficulty breathing and moving -- and was constantly bothered by the noise of machines and fumes.

There is a great deal of stainless steel <sup>l</sup> used in the construction of walls doors and other structural components. Pumps continue to churn away at the process of moving something from the site -- pushing it upward and outward.

HANDLE VIA SPECT CHANNELS ONLY

How'd we get  
doors
