# Summary of Information

EFI #1: When: Between 2100 14 Jul 90 and 1200 16 Jul 90  
with emphasis during early morning hours of  
15 Jul 90

Where:

EFI #2: 11° 05' N 49° 10' 30" W

EFI #3: Description: see diagrams pages 7 & 8.  
Target has a two tone hull and an  
off white or dirty tan superstructure.  
The hull is a medium shade of grey, brown  
or green. A darker portion occurs  
just below the gunwale in the bow.

There is a mast-like projection on the  
bow portion of the ~~deck~~ deck. However,  
something is peculiar about this, as if  
the mast has been 1) broken off 2) broken  
and repaired or 3) containing, or having  
attached to it, an object or apparatus  
that is not typically found on a "mast".  
(see page 7)

The superstructure (see page 8) is  
squarish and <sup>at least</sup> two levels high. There  
are two circular black holes of round  
objects on the front of the superstructure
