- E. SESSION SUMMARY:

Site appears to be a long, rectangular one story building in an area of similar buildings, with all the land in between the buildings paved. The target structure is some distance away (possibly 2 or 3 blocks) from a body of water, but the entire district is directly associated with the water area (like a port or harbor area).

The inside of the structure is clean, well lit, spacious and airy. There are all types of containers sitting around on the floor, and a motorized vehicle (fork lift?) brings new ones in and takes old ones out every now and then. There was the impression that the containers consist of boxes, barrels, etc., with only a very few of each type. These are not whole shipments, but appear to be samples of containers taken from larger shipments which are located in other buildings. The containers are "worked on", then returned to their original locations after 0-2 days time.

There are 5-8 people in the target structure, all males, with light, possibly yellowish skin. They are small, casually dressed, and of slight, wiry stature. "Work" on the containers which are brought in consists of opening each up, rummaging through the contents, usually placing something within the contents, sealing the container back up, marking an "X" on it in grease pencil, and moving it to the side to await return to its original location. All activities are well organized, smoothly run, and not hurried.

The items perceived as being inserted into the shipments were

a package of diamonds inserted into a container of clothing and several stacks of paper money being inserted into some leather goods which appeared to be shoes, boots, or purses (small leather items, not leather clothing).
