SUMMARY OF INFORMATION

The target is located in a flat, open area, with a few structures. The main activity in this area seems to be movement. There are people talking about moving certain objects to a new location. Either the objects or the location is "hidden".

There are vehicles in this area. There is one vehicle that looks like a truck of some kind, moving equipment. It seems to be an elaborate production, planned in some way, moving these objects or equipment "down". There is something dark in the middle of something wide and bright. There are men who are "down-loading" the objects or equipment into the dark area. It almost seems to be underground.

There are many objects of various shapes all around the area. Most of the shapes are rounded in some way. Others are long, straight shapes, which are stacked. There is a very large, bright, almost glowing red shape. It is circular, but it also seems to open up in the middle. This red shape has waves of energy or light associated with it. There is something cracked, and abrasive that looks like two diagonal lines coming together at a point. There is a green odd-shaped object.

There is a huge, machine-like object that is pointed on one end. The sides of this object are curved. There are many different little shapes (rectangles, squares, numerals) on this object which make it "go", but it is impossible to draw it.

Inside this object is a clear liquid (like water), some kind of rods which are at different lengths, and red stuff. When this object is "on" it shakes and twitches.

The overall feeling of the target area is scientific and political.
