PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 0029 (Tng)

SESSION NUMBER:

DATE OF SESSION:

30 JAN 90

DATE OF REPORT: 30 JAN 90

START:

1330

END:

1333

METHODOLOGY: CRV

VIEWER IDENTIFIER: 052

- 1. (S/NF/SK) MISSION: To describe the target site (Andros Island, Grand Bahamas) in Stage I terminology.
- m La (S/NF/SK) VIEWER TASKING: Encrypted coordinates only.
- (S/NF/SK) COMMENTS: No Physical Inclemencies. Site was resolved on the first IAB sequence. NOTE: This site is located next to a much more advanced natural feature; a natural interface between ocean and fresh water. With the understanding that the official session was over, and there was therefore no pressure to perform, O52 was given the "opportunity to try a much more advanced site, as a reward". The concept of water/water interface was perceived on the 1st full IAB sequence. It appears that 052 is guickly becoming proficient enough to proceed into stage II.
- 4. (S/NF/SK) EVALUATION:

5. (S/NF/SK) SEARCH EVALUATION: N/A

MONITOR: 018

HANDLE VIA SKEET CHANNELS ONLY
