| PROJECT NUMBER:  | 0100 (Tng)          | SESSION NUMBER:    | 1         |
| DATE OF SESSION: | 23 MAR 90           | DATE OF REPORT:    | 28 MAR 90 |
| START:           | 1535                | END:               | 1540      |
| METHODOLOGY:     | <del>CRW</del> Solo | VIEWER IDENTIFIER: | 052       |

1. (S/SK) MISSION: To describe the target site (Taal Volcano w/ lake, Phillipines) in Stage 1 terminology, working solo.
2. (S/SK) VIEWER TASKING: Encrypted coordinates only.
3. (S/SK) COMMENTS: No Physical Inclemencies. 052 got the correct ideogram but did not decode it with complete accuracy. (Moutain was decoded as a structure).
4. (S/SK) EVALUATION: *2*
5. (S/SK) SEARCH EVALUATION: N/A

MONITOR: SOLO

MANILA TIMES (RIGHT); KODACHROME BY TED SPIEGEL, PAPHO GUILLUMETTE © N.S.S.  
Nearly 3,000 people lived on the five-mile-long by three-mile-wide island before the eruption; many have since returned to their homes. Water-filled crater at center of the large picture formed in a 1911 eruption that claimed 1,335 lives.

from the new crater in the inlet. Steam shot a thousand feet aloft, spreading debris so thick that it buried scores of the cataclysm's 200 victims and their flourishing stands of coconut and banana. Two days later the volcano still belched (inset).

Crater-pocked time bomb, Taal Volcano rises from Lake Taal, 40 miles south of Manila. Dormant for half a century, the volcanic island suddenly erupted in September, 1965, blasting out the inlet at upper right and spewing ash and pumice
