PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

---

PROJECT NUMBER: S3 TRNG	SESSION NUMBER: 1
DATE OF SESSION: 880912	DATE OF REPORT: 880913
START: 1440	END: 1515
METHODOLOGY: CRV	VIEWER IDENTIFIER: 032

---

1. (S/NF/SK) MISSION: Access and describe in a stage one sense training target # 097, O'Hare Airport, Chicago.
2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates 9777/8809.
3. (S/NF/SK) COMMENTS: 032 learned about AOL drive today. Early on he exhibited much confusion about an ideogram (for motion) but did not objectify this to the monitor. He proceeded to incorrectly decode the ideogram (it looked similar to an island ideogram he had before), thus accepting a false B. He then had an AOL which supported this false B, and this combined with his strong AOL matching in the morning session, made him believe he had AOL matching and he proceeded into AOL drive. His structure fell apart at this point and he made the comment that he knew he was out of structure but he felt he was on. As monitor, I decided to let him progress on his own so that he could experience AOL drive and learn from it. He moved into stage 3 even though he had insufficient stage 2 dimensional contact and produced a beautiful AOL sketch. 032 learned a great deal from this session, he finally realizes why AOL is dealt with in structure. He also learned how AOL drive is caused and how to recognize when it is occurring.
4. EVALUATION: 2.
