PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 5237	SESSION NUMBER: 1
DATE OF SESSION: 890515	DATE OF REPORT: 890516
START: 1006	END: 1030
METHODOLOGY: ERV	VIEWER IDENTIFIER: 032

1. (S/NF/SK) MISSION: Describe the target structure and it's key function. Describe the key activities at the target structure. Determine the extent of its current capabilities, determine the extent of its operational capabilities.
2. (S/NF/SK) VIEWER TASKING: Coordinates. After 032 achieved initial site contact he was given instructions to "focus on the key structure"-- he reported having difficulties perceiving anything in response to the cue. 032 was then given the instruction to "move to a position 3000 ft up." After describing the site 032 was told to "focus in on any activity." He reported bad weather/a blizzard, so instructions were given to "move to the closest, past clear day." Other in-session cues included "how is the object moving out of the building?" "why is it shimmering?" and "what will they do with the object?"
3. (S/NF/SK) COMMENTS: Next session will be spent focusing in on the key structure.
4. EVALUATION: (4)

SUMMARY OF INFORMATION

The Target is a series of structures -- a compound. The compound is located in an area that is cold, windy and snowy. At the site several dark objects were moving in a straight line across the landscape. Several brick structures were located at the site approximately 100 meters apart from each other -- there were evergreen trees next to these structures.

An overhead sketch of the site is attached. There were several large grey buildings that resembled A/S warehouses or storage areas. There were many vehicles around the area that all looked the same, dark in color, A/S military vehicles.

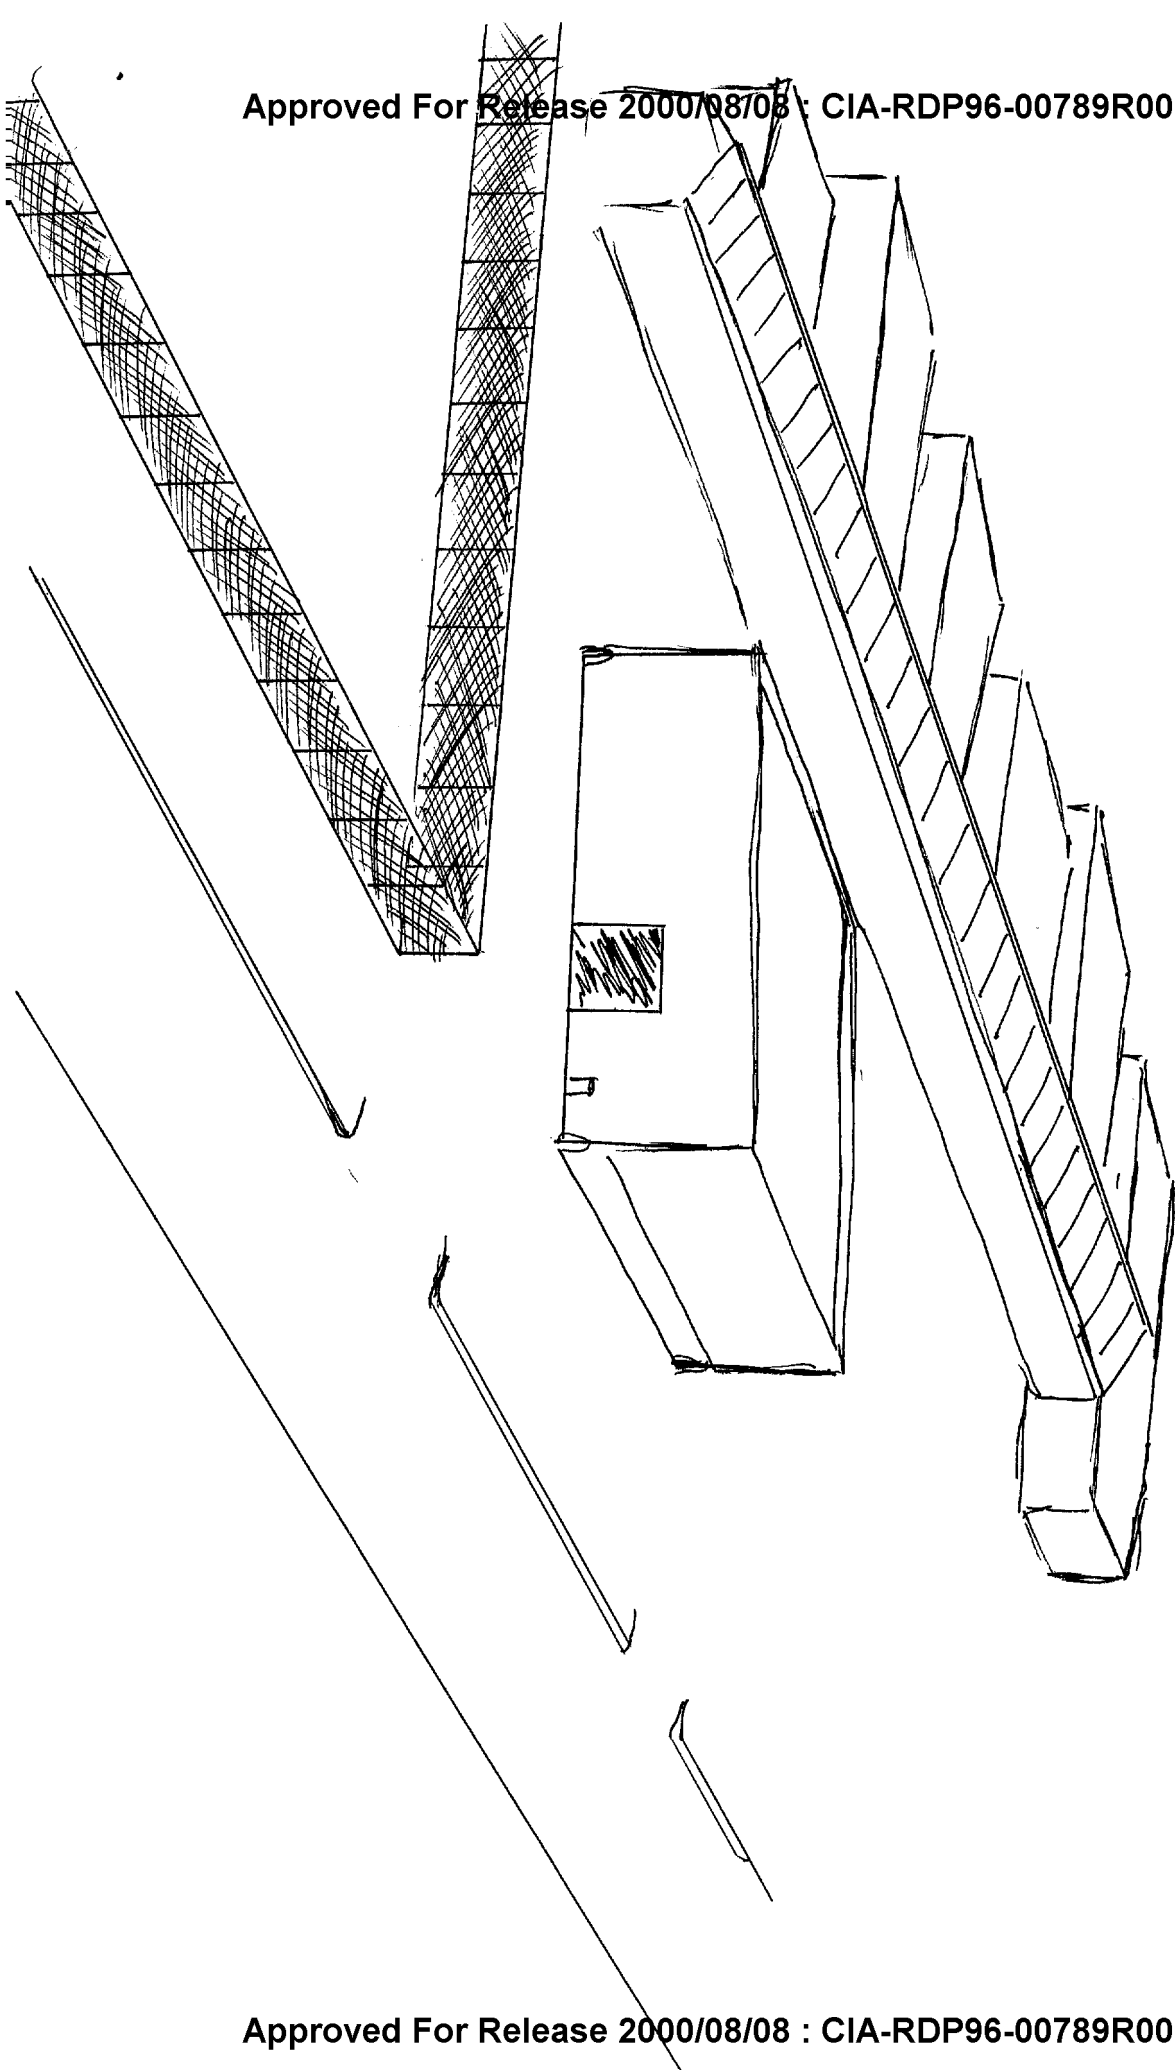

The entire place reminded me of A/S a military base or some government facility. There was a chainlink fence close to the largest building. This large building had doors which rolled back to the sides. A large object began moving out from the building -- through the doors. It was not under it's own power, but was being rolled out on something, like A/S a tractor or trailer.

This object "shimmered" -- it's appearance was that of a mirror, giving it a translucent look. It was much like, A/S slick chrome. It reflected light in an unfamiliar way. It shimmered the light much like, A/S a desert has heat waves rising up from it's floor. That is what this thing looked like, it shimmered and by doing so it removed any and all of it's outline. This is the purpose of this object -- to hide, deceive or camouflage it's existence. The object moves and when it does it does so it is supposed to do so undetected.

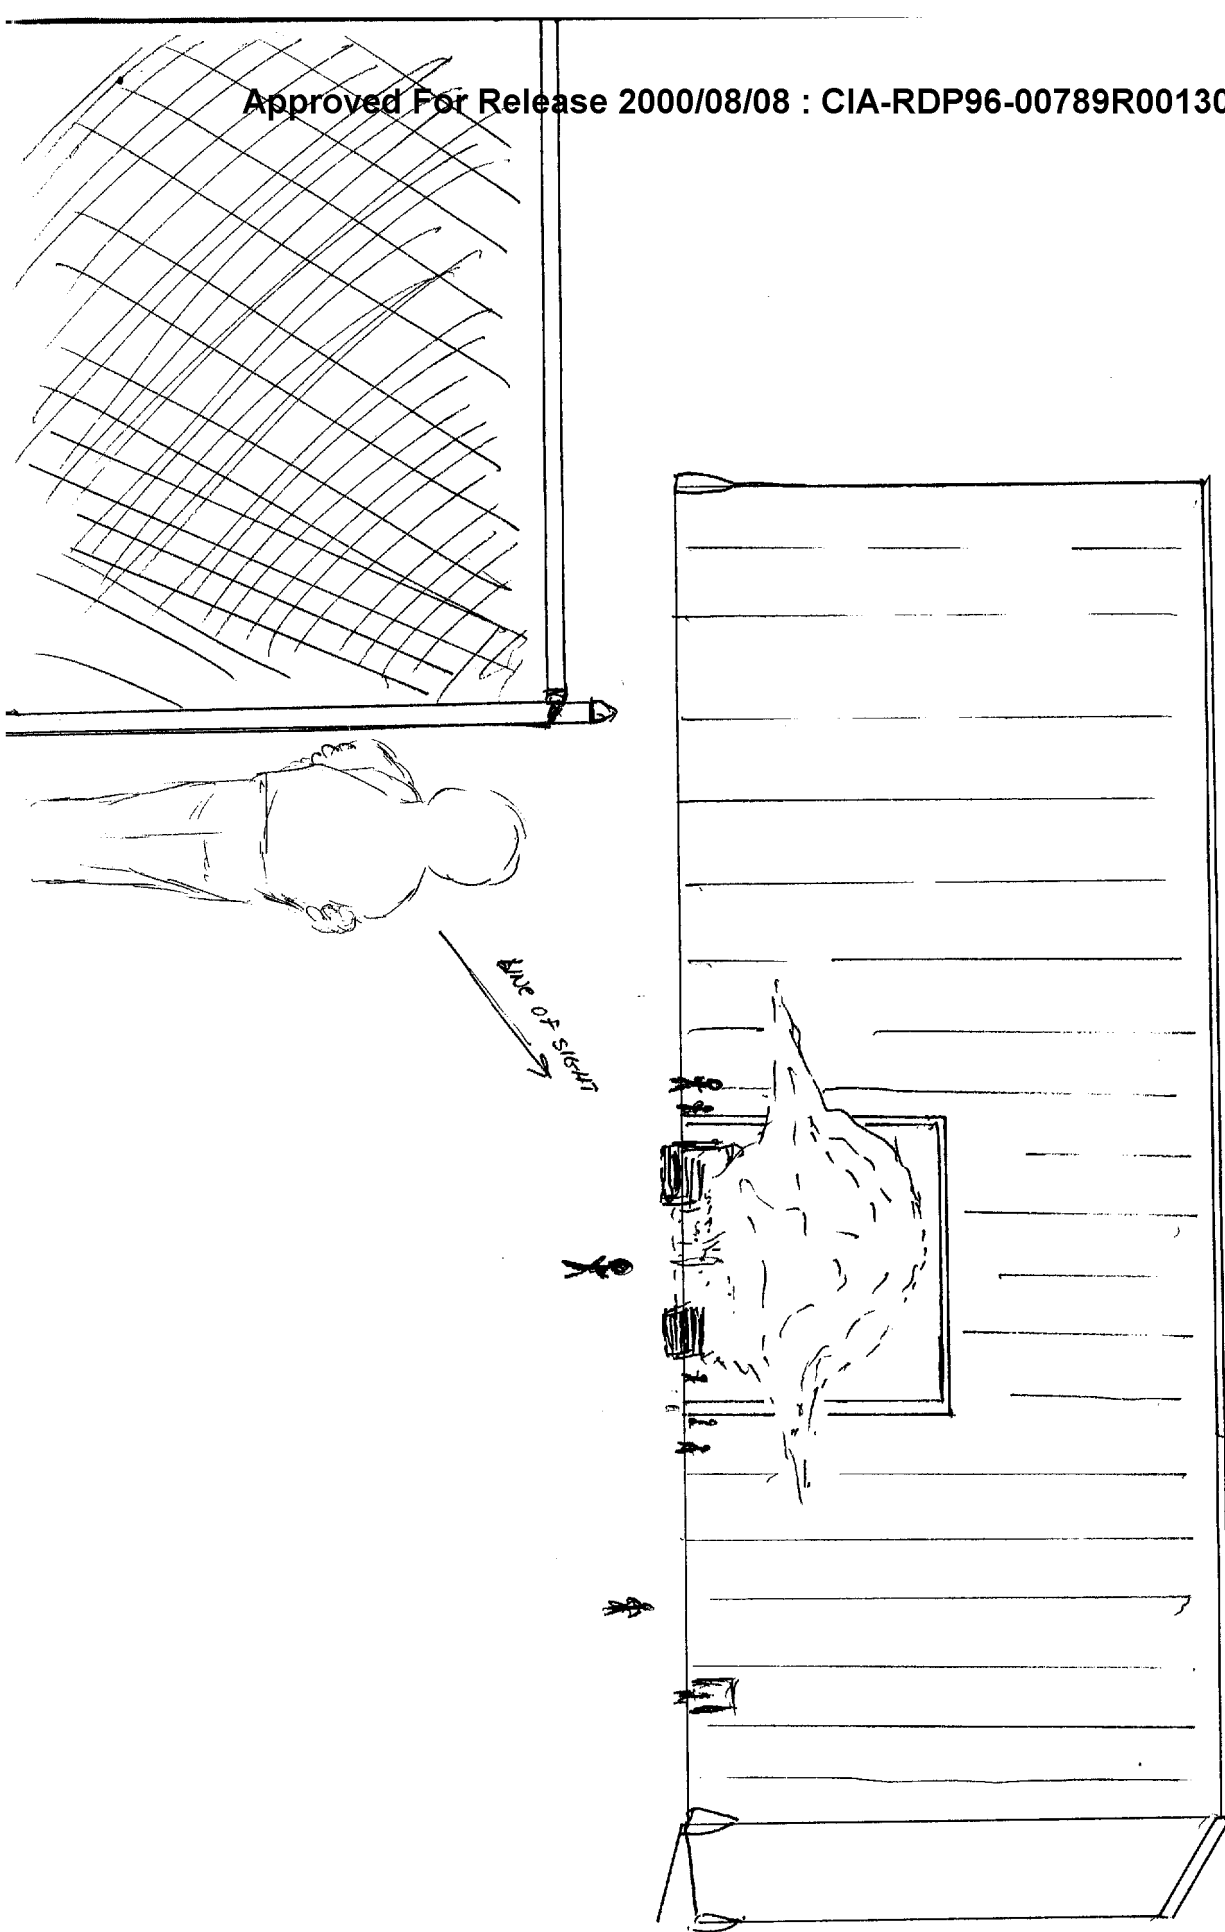

At the rear of the object there were two large cylindrical object which had black holes in them. The object was rolled out of the building front first. It is taller in the rear than in the front and it appears to be military.
