1. (S/NF/SK) MISSION: Access and describe
[REDACTED] tank. [REDACTED]

2. (S/NF/SK) VIEWER TASKING: Access and describe the target
of interest at Encrypted Coordinates 825154/135457.

3. (S/NF/SK) COMMENTS: Physical inclemencies of cold and
sleepy were declared. Viewer 018 accessed the and described the
target. Had the target further been refined to describe the
concept of tank, this session would have been assessed of high
value. A Summary of Information is attached to this report.

1. (S/NF/SK) Statistics:

Viewer:	018
Session date:	3 JAN 89
Start time:	1005
End time:	1105
Mode of operation:	CRV SOLO
PI:	Cold, sleepy
AV:	None

2. (S/NF/SK) Cuing: "Access and describe the target of interest at encrypted coordinates 825154/135457."

3. (S/NF/SK) Results:

a. The target is a "manmade" (object or structure) located on rough terrain, near water. The "manmade" has a strong feeling of "up and away" motion.

b. Reaccessing the "manmade", it appeared to be a "squat", unpleasant-looking, object which impressed me as being much smaller than I would expect. It was sitting still on very dark, rocky/gravelly ground. I could tell that this access was at a later time than the previous one.

1) Its top section is angular (see sketches, pages 4, 5, & 6), large pieces or panels of dark brown or brownish gold material. Some of this material is soft and wrinkled.

2) Its bottom section is rounded and smooth and very dark (see sketch, top of page 9).

3) It is elevated from the ground by metallic "legs" or "struts" (see sketches, pages 6,7,8,& 9) which appear to come from either its middle or its top side, at seemingly random angles. I could find no symmetric appearance to these "struts"

c. I began to realize that incoming impressions were matching very closely with early AOLs and AOL-signal impressions. I ended the session, fearing that I had inadvertently gone into AOL drive.
