WORKING PAPER

Project: 6038  
Date: 900119  
Time: 0927-0956  
Viewer: 018  
Session: 02

SUMMARY OF INFORMATION:

1. (S/NF/SK) Describe the purpose of the target site: There were repeated and strong impressions that the target site is used for the manufacture/production of specific chemicals. The process is one of repeatedly changing chemicals from one form to another until the desired chemical formula is achieved. One part of the process appears to depend on reactions changing phenylketonics to a form of phenylamine, then to a chemical very similar to (if not actually) phenolbarbital.
2. The place, as well as the manufacturing process has both a legal and an illegal side. The production setup appears to be legal, but a "piggyback" operation appears to be taking place, where extra chemicals are brought in as raw materials, resulting in extra amounts of end products which are "skimmed off" and not accounted for. These extra end products go into the illegal market.
